

ITD CADD Services

COMPANY OVERVIEW

- Stacie Arbuckle founded ITD CADD in 1998 with a vision to build an exceptional transportation engineering support firm dedicated to providing quality, value-based CADD services for clients in Georgia, Alabama, and Florida. This focus has enabled ITD CADD to be recognized as a premiere provider of MicroStation CADD services in the field of road and bridge engineering.

CORE COMPETENCIES & DESCRIPTION OF SERVICES AND/OR PRODUCTS

- The firm focuses primarily on bridge work with past projects that include work on all types of new, widened, and rehabilitated bridge structures from traditional prestressed AASHTO girders and deep, long span structural steel plate girders to smaller cast-in-place structures and culverts. In addition to bridges ITD CADD can handle roadway and drainage work, traffic plans, tunnels, and erosion control plans. I have done many turnkey projects that required a complete sets of construction plans.

MANAGEMENT PROFILES

- Stacie Arbuckle is President and manager of this Sole Proprietor Company

PROJECT EXPERIENCE/REFERENCES

- Experience includes working for owners such as Georgia DOT, Alabama DOT, Cobb County DOT, Gwinnett County DOT, Paulding County DOT, Fulton County Department of Public Works, DeKalb County DOT, and many metro Atlanta cities such as Smyrna, Powder Springs, and Marietta. Past clients include many prominent Georgia firms such as Reynolds, Smith & Hill, Moreland Altobelli Associates, Hatch Mott MacDonald, J. B. Trimble, Moffat & Nichol, CERM, HDR, and Atkins Global.
