

## **Richmond, VA Digital Forensic Consulting Firm Offers Specialized Investigative Services**

*Pro Digital Forensic Consulting now offers a menu of Specialized Investigative Services for Clients*

United States -- Free-Press-Release.com -- Oct 18, 2015 -- Richmond, Virginia (USA)

Richmond, VA based Professional Digital Forensic Consulting, LLC (DBA Pro Digital) announces that they are now offering a menu of specialized investigative services geared toward more complex and technical needs of clients in Central Virginia and throughout the U.S. The firm, which previously only offered forensic data acquisition, analysis, reporting and expert witness services, has recently met all criteria and registered as a Private Investigative Agency through the Virginia Department of Criminal Justice Services (#11-14869).

Pro Digital Principal Consultant, Patrick Siewert, said this about the new services: "It is our aim with this new suite of Special Investigative Services to offer attorneys and individual clients access to services that other Private Investigative companies may not offer. We'll use our highly technical and advanced training to provide online investigations, background investigations, missing persons and employee misconduct, waste, fraud and abuse investigations, in addition to criminal defense and interview and interrogation as cases dictate."

Siewert, a 15-year law enforcement veteran, previously investigated high-tech and electronically-facilitated crimes through the Southern Virginia Internet Crimes Against Children (ICAC) Task Force and his cases led to multiple record-setting sentences in the Commonwealth of Virginia.

Pro Digital, which was launched in 2013, will continue to offer it's suite of digital forensic services to litigators, other investigators and corporations as their primary line of business. "Digital Forensics has expanded beyond government and is now a highly sought-after resource in civil litigation and throughout the private sector", Siewert commented. "We will always offer Digital Forensics as a primary service for clients, but as a life-long Investigator, I thoroughly enjoy solving puzzles and getting to the truth. There's a sense of accomplishment with that which has led us to offer this new line of services."
