

# THE MEASURE OF CHRIST

## PATTERN OF THE PLANETS WITHIN THE SOLAR SYSTEM 'CHAKRAS'

The purpose of this illustration is to suggest that the Solar System is construed to that of the proportions of the human body form. Moreover, it is stipulated that the male body form is the 'Universal Template' from which all created things and begins are patterned after. Supremely, this 'male body form' is that of 'Christ'. This is not in regards to the New Age notion of the 'Universal Christ' or 'Christ Consciousness' but that of GOD the SON, who to one a human male body form and become mortal to redeem the fallen race of Adam and Eve. Such humans were special out of all other created beings in that humans were made in the 'likeness and image' of the Creator, YHVH. Nonetheless, if one superimposes the male human body form as in the Vitruvian Man, it would appear that the distance of the various planets in the Solar System correspond to specific nodes in the male human form. The Planets also follow the color light spectrum of frequency and resonance that does also appear to match their color scheme in general. Interestingly, this 'rainbow' color scheme also follows the nodes of the various Chakras of the human body. It is mere

### I AM THE LIGHT OF THE WORLD

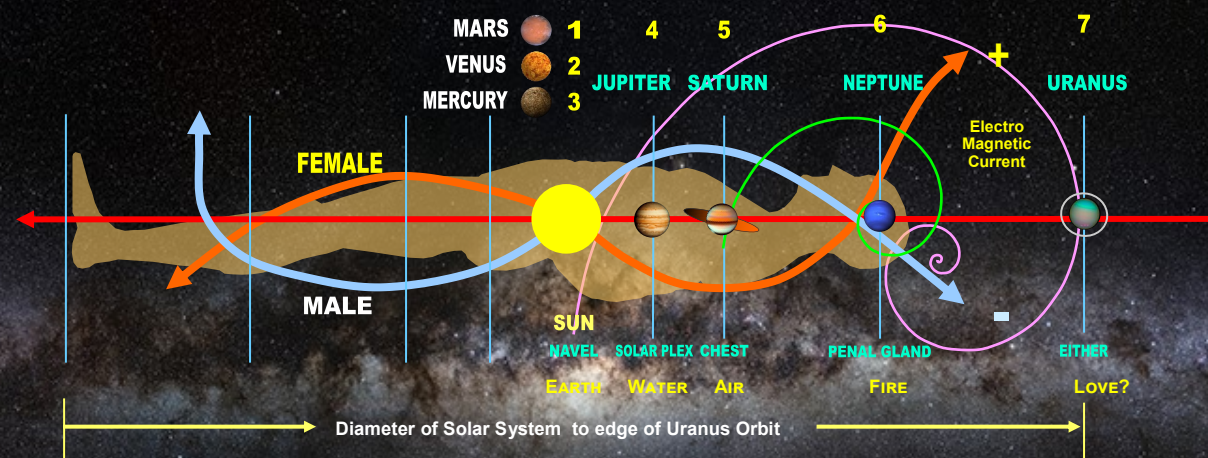

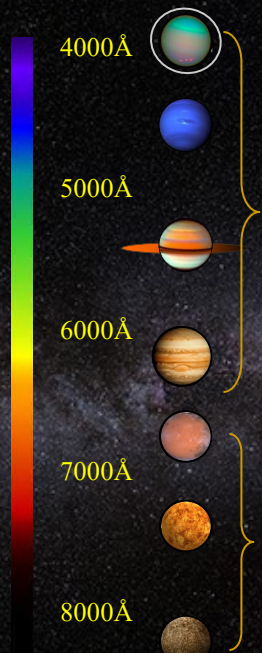

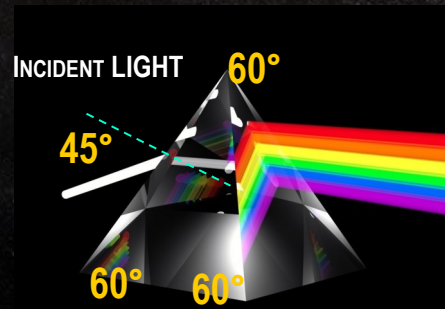

Whoever follows Me will not walk in darkness, but will have the Light of Life.

JESUS CHRIST

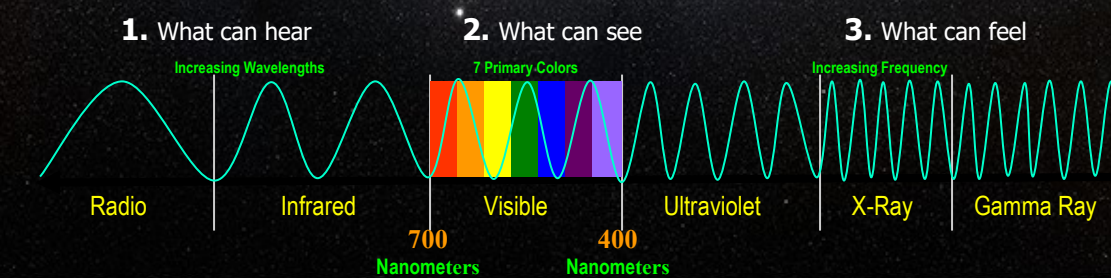

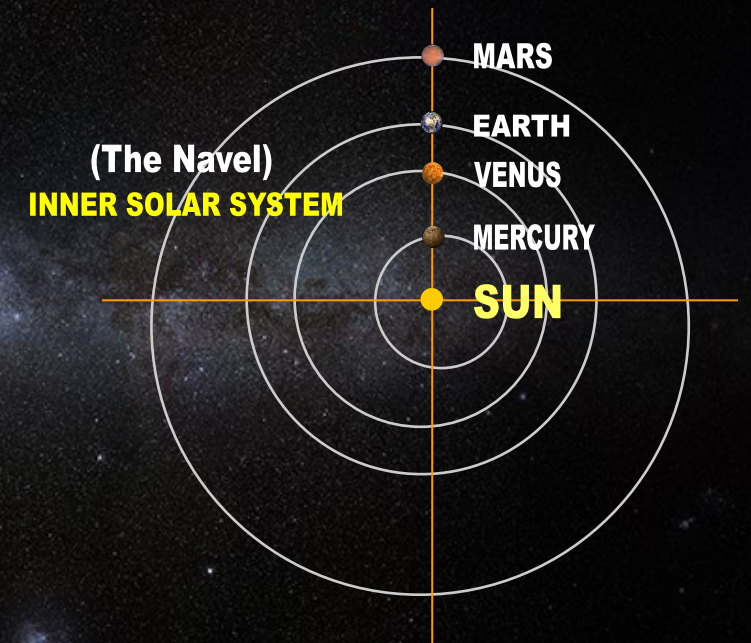

John 8:12

### TRINITY OF YHVH

YHVH is 'LIGHT'

Approximate scale of planetary orbits. Planets not to scale.

### THE SPEED OF LIGHT

The Speed of Light in vacuum, commonly denoted  $c$ , is a universal physical constant important in many areas of physics. Its exact value is 299,792,458 meters per second (approximately 300,000 km/s (186,000 mi/s)). It is exact because by international agreement a meter is defined to be the length of the path travelled by light in vacuum during a time interval of 1/299792458 second.

It takes but little over 8 minutes for the light originating from the Sun to reach Earth.
