

## 5-IN MULTI CYCLE CIRCULATION VALVE

Product No. 0710-150401-DA

---

The Multi Cycle circulating valve is an annulus pressure operated re-closable circulating valve. This tool is operated by repeatedly cycling the annulus pressure up to a predetermined amount and then releasing this pressure. This tool is designed to be run with an Annulus Pressure Operated Tester Valve.

### APPLICATIONS

- Test drill pipe going in hole
- Spot diesel cushion
- Flow-test well
- Reverse recovery
- Spot nitrogen cushion
- Spot acid
- Pump acid
- Flow test
- Dump mud on the formation
- Spot lost circulation pill
- Reverse circulate
- Drain drill pipe coming out of hole
