

New Generation Pavement Interlayer Utilized to Extend Pavement Service Life

GENERAL INFORMATION

Project Title: Federal Street Rehabilitation
Property Owner: City of Youngstown
Location: Youngstown, OH
Engineer: MS Consultants
Product Used: GlasPave 25
Installed By: PS Construction Fabrics
Install Date: May 2010
Contact: MS Consultants
Dave Marsico
330-744-5321

BACKGROUND

Reason for Product Use:

Underlying concrete had many transverse and longitudinal joints causing reflective cracking concerns for shortened pavement service life. Product select after detailed analysis by Tensar International and Dr. Jay Jun Kwon.

RESULTS

Product installed without issue. Performance monitoring will be on an annual basis. Expectations: 50% decrease in rate of reflective cracking. 50% decrease in life cycle maintenance costs. 80% pavement service life extension.
