

GREEN CLEANING

Toxic cleaning products are the thing of the past! Natural cleaning is in and its the safer route for not only your home and health, but for the indoor air quality and outside environment. This less invasive way to clean keeps harmful and smelly chemicals out of your day to day life, and it can also ease your wallet in the long term.

Although, its not a fast and convenient, it is a easy and healthier option.

ENVIRONMENTAL
DEPARTMENT

NATURAL INGREDIENTS

WATER

Most mixtures are diluted with water to make the most of there solution.

DISTILLED VINEGAR

Distilled vinegar is a natural, non-toxic bacteria killing agent used as a base element.

ESSENTIAL OILS

All essential oils have different purposes and properties.

BAKING/WASHING SODA

Depending on what your are cleaning either or both are great natural, non-toxic ingredient for cleaning solutions. When added to a liquid compound, it can become an acidic cleaner for tough stains and grime.

SOAP FLAKES OR LIQUID CASTILE SOAP

Soap flakes are a good additive for washing items. They derive from soap bars, turned to powder to be added into green cleaning mixtures. Liquid castile soap is essential the same idea by a different type of soap and in liquid form.

ALL PURPOSE CLEANING RECIPE

INGREDIENTS:

1 part distilled vinegar
1 part cups of water
***10-20 drops of essential oil**

*amount varies

INSIDE OUR BUCKETS

MASK

Using a mask safety, when cleaning will help reduce ingestion of fumes from products.

MICROFIBER CLOTHS

Microfiber cloths are a great substitute for rags and regular mops because microfiber are more effective in picking up dirt and bacteria due to the smaller and abundantly split fibers per volume. They are also non-abrasive, hypoallergenic and reusable.

SCRUB SPONGE

A scrub sponge has two side that can make this combination useful for more than one situation. The cellulose side is non-abrasive for counters, rinsed dishes, and spills. The scrub pad is useful for the same places with a tougher mess.

RUBBER GLOVES

Protecting your skin from cleaning products and from the unknown of the dirty mess.

SPRAY BOTTLE

An 8 oz bottle is helpful when you are mixing your green cleaning products.
