TAPES

COLD SHRINK TAPE

- Cold shrink tape is an ideal covering for cable lugs, splices and terminations.
- The tape “welds” itself chemically and mechanically to form a tough seal against weather and moisture.
- Can be used in temperatures from -40°C to 100°C.

J&B #	SIZE	QTY
40880	1" x 30'	EA

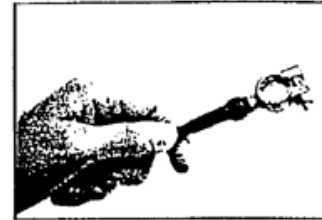

TO APPLY COLD SHRINK TAPE:

After stripping off interleaving film, stretch tape about three times normal length. Keep it stretched while wrapping.

Wrap one inch either side of area to be taped, overlapping each wrap at least one-half tape width. Break tape to end wrap.

Finished job should look like this. The cold shrink tape forms a tough watertight skin.
