

Teddy, A Wise Playground Builder

Named in Honor of a Builder and a little Boy.

Birthday: January 24.

Owls are warm, caring, with a silly sense of humor. They show good sense and judgment. They are builders, who fly above, to make sure they have everything needed so everyone can play.

"Children grow in all sorts of remarkable ways between the ages of three and six. What an exciting and important time in all areas of their lives! Day by day, they're able to do more and more things. They have better use of their hands and feet so they naturally are better able to manipulate things like crayons and blocks, as well as run, skip, and ride toys with pedals. All that growing feels so good." Fred Rogers

"'And if anyone knows anything about anything,' said Bear to himself, 'it's Owl who knows something about something,' he said, 'or my name's not Winnie-the-Pooh,' he said. 'Which it is,' he added. 'So there you are..'"
A. A. Milne
