

# KONTROL 4-4

## PRODUCT BEING APPLIED:

This MasterLine® Kontrol product is part of a product line of broad spectrum, superior formulation products that goes on clean and clear and provides quick knockdown of most mosquito species as well as other Diptera species such as biting and non-biting midges, black flies and gnats.

## ACTIVE INGREDIENT:

The low risk nature of permethrin is demonstrated by its use in many pet shampoos, including those for puppies and kittens, and in head louse shampoos as a recommended ingredient by many pediatricians. Permethrin also is used to impregnate clothing worn for preventing bites by ticks and other blood feeding pests in high risk areas as well as on mosquito netting.

## FEATURES:

- Superior Formulation – Clean, clear product.
- Low residual – Relatively short half-life, breaking down quickly in UV light
- Non-corrosive, it won't damage cars, trucks or airplanes when used correctly and according to the Label
- Quick Knockdown – Relief starts in just seconds. Insects are both knocked down and killed.
- May be applied over specific crops including alfalfa and range grasses, residential, municipalities, playgrounds, parks, golf courses, woodlands and campgrounds.
- Effective against most species of mosquitoes as well as flies and gnats.
- Low Odor.

Always Read and Follow Label Directions.
