

Jaeva Management achieves Xero Bronze Partner status

Nicola Moore-Miller, Managing Director at Jaeva Management Services, has demonstrated her commitment to ongoing service development following her Xero certified advisor accreditation late in 2015, to swiftly achieving Bronze Partner status in January 2016.

To become Xero certified, Nicola successfully completed the certification courses and exam involving stringent testing procedures. Now, to maintain her hard-earned Xero ranking, Nicola's required to gain education credits through continued learning. The Jaeva team has three Xero certified advisors, with a further two hoping to certify within the first quarter of 2016.

The Xero online accounting and payroll system is used by organisations to manage cash flow, reconcile bank accounts, process invoices and make payments. Xero has won many prestigious awards, most recently 'Client Software Product of the Year' at the British Accountancy Awards 2015.

With Xero certification, qualified Chartered Management Accountant, Nicola, can draw upon her extensive finance expertise and Xero software knowledge to help companies get set up on Xero, deal with their accounts, analyse performance and grow their business.

Nicola comments: "As a busy consultancy practice, we work with a number of different accountancy and case management products and Xero is one of our favourites.

"The Xero software is an incredibly intuitive, innovative and effective piece of software which is well received wherever we implement it.

"My accountancy background and Xero certification give me the ideal skill set to provide Xero users with the training and support they need to maximise their use of Xero, and manage their business financials more effectively. Real-time, accurate, timely accounting with optional integrated payroll is an essential tool for today's business managers. The growing Xero user base is clear evidence of this.

"My close partnership with Xero means that, as the software evolves, I'll be taught about its new and enhanced functionality within my educational programme, so that I'm able to preserve my positioning as an authority on all things Xero. Then, as and when Xero clients seek add-on training and consultancy support, I'm ideally placed to assist.

"We're excited to watch the next part of the Xero journey unfold as the product goes from strength to strength. Myself and another consultant from our business will be attending Xerocon 2016 in London this February and very much look forward to finding out what innovative new developments and add-ons Xero has lined up for us in 2016!"
