19 and under

WOODLAND AERO MODELERS

Radio Controlled Flying Club, Lemont

Gas, glow & electric aircraft - radio control & control line

Looking for a new and exciting hobby?

We always welcome new members of any age. So, if you are an experienced flyer, returning to the hobby, or are a complete beginner, come and talk to us about what we can offer.

We offer...

- Free flight training -
- Help and advice on equipment selection and purchase -
- Assistance with model building, repairs and technical issues -

Getting started is easy. Most first-time flyers opt for an "ARF" (Almost Ready to Fly) airplane. Very little building or experience is required. There are a lot of stable, easy to fly "Trainers" which are perfect for beginners.

Our instructors use the "Buddy Box" method where the two radios are linked together. The instructor can take control at any time. Mastering take-off, landing and basic flight should not take too long. Once you are a safe and competent flyer you will be presented with your Solo Flight Certificate.

The Club holds events throughout the year including our monthly meeting, summer evening social flying, Fun Fly competitions, family picnic, Swap Meet, and an Open House.

We will have an Open House on either Saturday 8th or Sunday 9th of June.

The date will be selected nearer the time depending upon the weather forecast.

Come and fly with an instructor for a free introductory flight, find out more about the hobby and our Club, or just watch some flying.

No need to book, just come along between **11am and 3pm**.

Check our website incase an Open House is cancelled or moved due to bad weather

Our flying field is within the Waterfall Glen Forest Preserve.
The entrance is on Bluff Road, 2 miles south of I-55 off Lemont Road.
