Introduction

With less than **7 days until ICD-10 implementation**, Michigan Department of Health and Human Services (MDHHS) wants to ensure that providers are prepared for the transition on **October 1st, 2015**. Please see below list of provider resources to assist your organization in a successful transition. Although we are close to the implementation date and you may have completed most of your ICD-10 tasks within your organization, please use the below helpful resources, which can also be found on our [website](#), to identify gaps or risks in your systems and processes:

MDHHS ICD-10 Resource Documents

- [Where Do I Start](#)

- [ICD-10 Provider Impacts Webcast](#)
- [ICD-10 Clinical Documentation Webcast](#)

Has your Organization tested with MDHHS?

MDHHS Testing for ICD-10 Is Critical for Success!

It is strongly encouraged to participate in **B2B Testing** with MDHHS to ensure claims will adjudicate properly. It is the only way to recognize deficiencies in your system and correct any issues prior to the deadline. ***The B2B Testing environment will be available after implementation.*** Please visit our website www.michigan.gov/5010icd10, click the ICD-10 Button and click Testing within the MDCH Links for the following testing opportunities:

- a. B2B Testing
- b. Outpatient Scenario-Based Testing
- c. Inpatient APR-DRG Comparative Testing

MDHHS ICD-10 Virtual Webinars

- Post Implementation ICD-10 Webinar is forthcoming/ Date TBD
- Please check the Medicaid Providers Website regularly for upcoming dates and times: www.michigan.gov/michicaidproviders

What to Expect on & after October 1st, 2015

Top Reasons ICD-10 Codes May Get Rejected

- Claim does not have a Valid ICD-10 or ICD-10 Qualifier
- Dual Sets of Codes on One Claim
- Date of Service for ICD-10 Code is prior to Implementation
- ICD-09 Code is submitted for Date of Service on or after October 1st, 2015
- Your organization is ICD-10 compliant; however, your Billing Vendor is not prepared and cannot send your claims in the appropriate format.
- Your organization utilizes a 4010 HIPAA format and relies on a Billing Vendor to convert codes to the proper 5010 HIPAA format. However, your Vendor cannot convert the codes properly and is not prepared.

Post Implementation Activities

After ICD-10 implementation, it is important to monitor all processes to confirm their effectiveness and sustainability. These include:

- Clinical documentation changes
- Coding practices and processes
- Revenue cycle processes and changes
- Other organization adaptations made during the transition

MDHHS Claims Processing and Policy Updates

- **A valid ICD-10 Code is required for dates of services on or after Oct. 1, 2015**
 - 3-7 character ICD-10 Diagnosis Code for Professional Services
 - 7 character ICD-10 PCS Code for Inpatient Procedures
- **Submit only ONE CODE SET per Claim**
 - For Professional, Dental and most Institutional Claims with dates spanning October 1, 2015, claims must be split
 - Select the appropriate code set based on the **FROM** date of service
- **Inpatient Claims are based on Date of Discharge**
 - Date of service driven
 - Select the appropriate code set based on the THROUGH/dates that occur on or after October 1, 2015
- **CMS Guidance regarding Flexibilities of Submission of ICD-10 Codes**
 - CMS is extending flexibilities in submission of ICD-10 codes for 12 months with regard to relaxing auditing and rejecting claims that are lacking specificity as long as the ICD-10 codes submitted are in the correct "Family of Codes".
 - ***HOWEVER***, the official Guidance (flexibilities) only applies to Medicare fee-for-service claims from physician or other practitioner claims billed under the Medicare Fee-for-Service Part B physician fee schedule.
 - ***This Guidance does not apply to claims submitted for beneficiaries with Medicaid coverage, either primary or secondary.***
 - ***THEREFORE***, MDHHS **WILL NOT** follow the same flexibility guidelines as Medicare.
 - ***CMS ICD-10 Official Guidance***
