Information for Parents

Here at DDO day camp we aim to provide your children with a safe and amazing summer!

Our staff are trained in areas of animation, safety measures, covid training, pool side safety, CPR, intervention, and have a great passion for working with kids!

Our safety measures at our Chalets consist of a 1:10 ratio of animators to campers for Kidz/Athletics' Camp and a 1:15 ratio of animators to campers for Adventure Camp.

At all times of the day our animators are with the campers. When transitioning from activities there is always one animator at the back of the line and one at the front. The animators ensure that the environment is safe for the campers.

Pool side security: At all times our animators are in the water with the campers supervising them . All campers take a mandatory swim test conducted by the lifeguards, and life jackets are provided when necessary. Lifeguards are also on chair supervising campers.

Outing security: Our animators always remain with campers. Strategies are implemented to ensure the campers safety. When transitioning with campers, there is always an animator at the front and at the back of the line. Our animators are constantly taking attendance.

For beach and water outings, every 10-15 minutes our animators guide the campers out of the water to assemble in their groups to take attendance. Wave pools are forbidden when on outings. At the beach our staff form an open rectangular border for where the campers play.
