

List things that are more difficult for your child and may require a little more time allotted.
Example: Getting dressed after swim, putting on socks, eating, or transitions from one activity to the next etc.

List any terminology that your child does or does not respond well to:

Examples: Some children respond negatively to the words "Time Out". Others will show specific behavior when they are hungry and/or tired and need to be acknowledged in a certain way.

If you are having success with something at home or your OT suggests anything, please share them with us! Include things that are done or said for a given situation or behavior. Be sure to list the behavior with your response to that behavior.

Examples: When she appears to be moping around the house hitting the couch as she walks by, I ask her "Do you need a hug?" She gives a hug right away and starts talking about what she is upset about.

List anything else you want us to know or do:
