

# THE 1ST TOTAL BLOOD MOON OF THE TETRAD

## COINCIDING WITH THE HOLY APPOINTED TIMES OF YHWH PASSOVER APRIL 15, 2014

The 1<sup>st</sup> of the Total Blood Red Moons of the Tetrad will start on April 15, 2014. It will be visible in the Western Hemisphere. A total lunar eclipse can only take place on Full Moon. April 14, happens to be the beginning of Passover and when the eclipse actually starts to build. A total lunar eclipse also means that the entire moon will travel through the shadow of the Earth called the Umbra. The 'blood red' appearance occurs as a result of the color spectrum of the Earth's atmosphere and due to such factors as atmospheric dust and gases. The eclipse will start around midnight California time April 15. From start to finish the eclipse will last about 3 hours. The actual total eclipse phase will last 77 minutes. What is interesting is that at the eclipses zenith or Totality occurs near Easter Island. From Earth's perspective, the Blood Red Moon will occur about 2 degrees from the Blue Star Spica in the constellation Virgo. The timeline shows the Spring Feasts starting with Passover and ending with Feast of First Fruits. The times in-between the major Feast markers approximate the phi-ratio proportions.

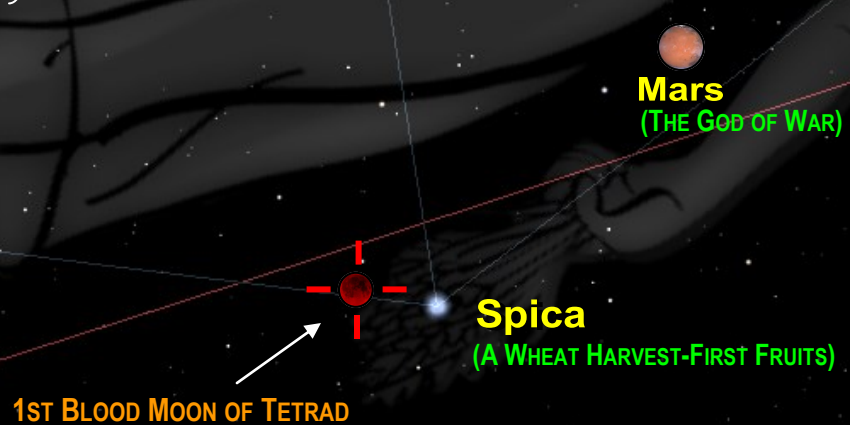

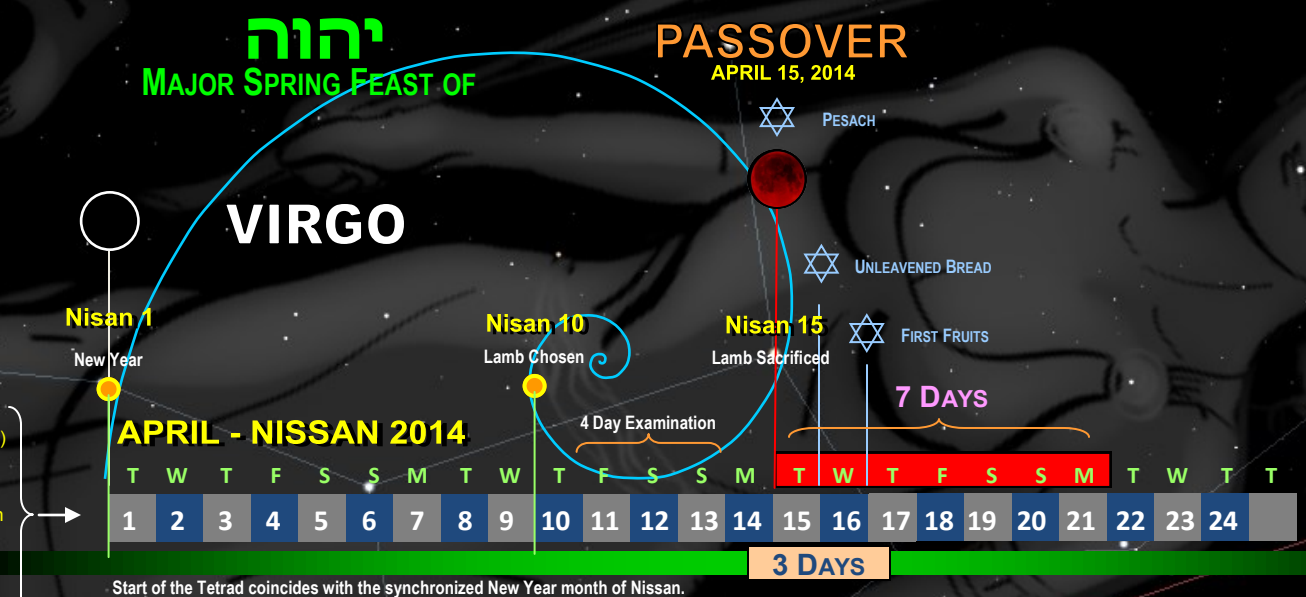

A Tetrad is when 4 consecutive total Red Blood Moon occur without any partial lunar eclipse in between such. They come in pairs and are separated by about 6 months. This Tetrad is suggested to be the 3<sup>rd</sup> in the cluster series that started in 1949 and is believed many to be associated prophetically with Israel and the Holy Feast of GOD. There have been other Tetrads but what is unique about these is that all 4 fall on either a Passover or Sukkot Feast that perhaps will usher in something monumental. Only 7 prior have occurred since Christ.

### THE TETRAD

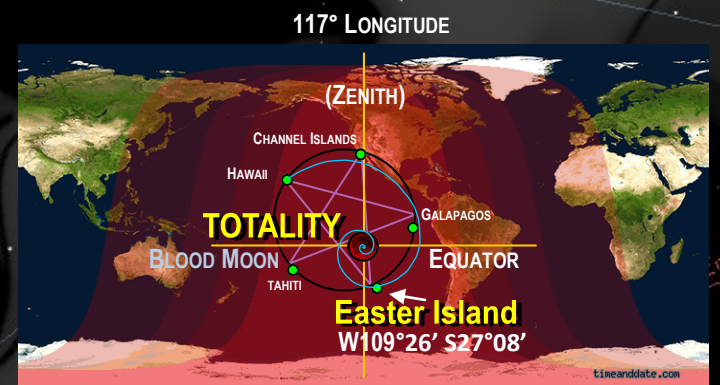

Date	Type	Saros	Umbral Mag	Duration
2014 Apr 15	Total	122	1.291	03h35m
2014 Oct 08	Total	127	1.166	03h20m
2015 Apr 04	Total	132	1.001	03h29m
2015 Sep 28	Total	137	1.276	03h20m

**EASTER ISLAND (CHILE)**  
 Easter Island is famed for its monolith statues that are looking towards the heavens as if expecting an arrival. They are all facing the eastern sunrise direction. It is considered one of the most remote areas in the world. The island is shaped like a triangle or perhaps a 'pyramid'. The monoliths are called Moai. Esoterically it is considered a 'navel' of the world. During the zenith of the 1st Blood Moon of the Tetrad, the stage of Totality will be within approximately, 1948 kilometers from the Eclipse.

Interestingly the Blood Moon reaches its Zenith near Easter Island within 5 days of when Easter is celebrated in the West, April 20th. Does Easter Island hold a key or a significant clue as to its near conjunction with the start of the Tetrad? Is Virgo and the 5 island of the Pacific Rim alignment significant?

### Total Lunar Eclipse of 2014 Apr 15

Ecliptic Conjunction = 07:43:25.1 TD (= 07:42:16.5 UT)  
 Greatest Eclipse = 07:46:47.6 TD (= 07:45:38.9 UT)

Penumbral Magnitude = 2.3182 P. Radius = 1.2266° Gamma = -0.3017  
 Umbral Magnitude = 1.2907 U. Radius = 0.6952° Axis = 0.2863°

Saros Series = 122 Member = 56 of 75

Sun at Greatest Eclipse (Geocentric Coordinates)  
 R.A. = 01h33m40.0s  
 Dec. = +09°46'27.6"  
 S.D. = 00°15'56.6"  
 H.P. = 00°00'08.8"

Moon at Greatest Eclipse (Geocentric Coordinates)  
 R.A. = 13h33m21.1s  
 Dec. = -10°02'59.8"  
 S.D. = 00°15'30.9"  
 H.P. = 00°56'56.4"
