Lineup Sheet notes:

The top 8 (or 9) players listed are those who played the most at each position of all other players on the team (with a few exceptions over the years). These players are listed in a suggested batting lineup order (based on actual league stats.)

The next section of names for each team are the starting pitchers listed by Batters Faced (descending order).

The third section is a list of relievers. Usually the "closer" is listed first. Then the balance of usual relievers is listed by Batters Faced (descending order).

The next section may or may not exist depending on the number of pitchers appearing during the season for this team. The pitchers are list in alphabetical order and labeled S, R or B depending on whether the pitchers was primarily a starter, reliever or both.

The last section of players is made up of remaining position players who appeared anytime during the season -- alpha order.

At times you may notice that the same player is included with more than one team. Each player is carded for each team he played for during the complete season. Each card being created based on his performance for each team. No card exists that is based on all stats for all teams played on during the entire season.

Special Base Stealing:
