

# RE-EDUCATION

The goal: “not to ‘cure’ the child, but to enable the ecological system, of which the child is a defining member, to work reasonably well...

...emotional disturbance is a symptom...of a malfunctioning ecosystem.”

N. Hobbs

“The patient is taught....given an opportunity to learn for himself more effective ways of dealing with problems and relationships....goal is not merely to eliminate disturbing reactions..., but to replace them with more successful behaviors.”

Encyclopedia of Human Behavior
