

Philomene Streetscape

Philomene Boulevard had been an eyesore in the middle of Downtown Allen Park for too long. The pavement was crumbling, the lighting was poor and there wasn't a speck of landscape to be seen. When the DDA identified the project as a #1 priority they engaged livingLAB in the discussion on what was the best use of available funding to gain the most value for their dollar. The project goals included:

- Improve Aesthetics and Increase Property Values
- Economic Development for Individual Businesses
- Organize the street to allow for festival staging
- Create a Walkable Street
- Beautify utility areas and remove overhead lines

The project consists of sidewalk improvements, pedestrian crosswalks, new curb and on-street parking, planting, lighting, street furniture, upgraded underground drainage, service area improvements and the addition of a pedestrian drop-off area.

Location:
Allen Park, MI

Client:
Allen Park DDA

Scope:
Design
Stakeholder Engagement
Plans and Specifications
Construction Inspection

Completion Date:
2012
