

Fight the Effects of Aging and Win the Battle of the Bulge

# Dr. Harry Glassman

Co-owner and Medical Director of Thibiant Institute of Aesthetic Medicine in Beverly Hills

## REVERSE

### Anti-Aging Light Therapy

Dr. Glassman's SkinClinical team of physicians, scientists and engineers developed SkinClinical Reverse Anti-Aging Light Therapy—a hand-held, first of its kind home use red and infrared LED device for full face treatment of fine lines and wrinkles. Reverse Anti-Aging Light Therapy is clinically proven to improve texture, elasticity and firmness. Patented scientific ingredients and cutting-edge technology produce results from devices used by cosmetic doctors. Apply the device for three minutes per area each day to painlessly increase collagen production and diminish wrinkles. Anti-aging results outside a doctor's office, a fraction of the cost and time.

## SculpSure Breakthrough In Body Contouring

- FDA Clinically Proven Laser Treatment •
- Non-Invasive • Zero Recovery
- One or Two Treatments.

### Why is SculpSure successful?

**Dr. Glassman:** SculpSure targets fat cells in 25 minutes without puncturing skin. Cells are removed through natural elimination. Results are seen within 6 weeks; and optimal results are seen within 12 weeks.

Dr. Harry Glassman is a Beverly Hills Plastic Surgeon in practice for more than 30-years. His cosmetic expertise is seen on A-list celebrities and his reconstructive surgery change lives of people with birth defects, injuries, and devastating effects of serious illness. Dr. Glassman is the co-owner and Medical Director of Thibiant Institute of Aesthetic Medicine Beverly Hills.

Founded in 1982 by Aida Thibiant, the Institute specializes in rejuvenation and restoration of the face and body.

### How is SculpSure different from other fat removal treatments?

**Dr. Glassman:** No surgery is involved; 90% of patients report satisfaction. SculpSure helps those with visible fat that is disproportionate to their body type.

### What's involved in the treatment?

**Dr. Glassman:** The 25-minute treatment is pain-free. We can do different areas at the same time. A hands-free, highly-effective wavelength energy delivery system targets fat cells below the skin's surface. ■

Thibiant Institute of Aesthetic Medicine
