

FRUIT:

Actinidia 'September Sun' to Prunus avium 'Black York'

Actinidia

Actinidia 'September Sun' *September Sun Hardy Kiwi*

NEW! This fast growing vine always has landscape interest with plentiful, small, white bloom in spring, breathtaking white and pink irregularly variegated foliage and a flood of sweet, small, tasty fruit in summer. Easy to grow and perfect for screening.

H: 15-20" W: 15-20" Zones: 5-9

Aronia

Aronia melanocarpa Viking *Viking Chokeberry*

NEW! While we were admiring the beauty, toughness and hardiness of this Swedish introduction in the landscape, the Swede's were back home doing the same yet taking it a step further. Rather than leaving its ample fruit to the birds each year, they were harvesting it because they already knew that it was off the charts for anti-oxidant content. Rather than making more birds healthy, they used the fruit in preserves, jams, fruit drinks and even wine to take full advantage of its great taste and strong health benefits. Now you can do the same with this very low maintenance plant that will thrive even in the least fertile, roughest landscape spot. 'Viking' flowers in mid-May and will give rise to flattened heads of green fruit that turn jet black when they mature later in the summer. Be sure to net the plants when the fruit matures or you will fighting with your birds in a harvesting contest! After harvesting, enjoy the view in the fall as its deep green foliage turns fiery red as the weather cools! Goodness Grows Edibles.

H: 5-6' W: 5-6' Zones: 3-8

Lonicera

Lonicera caerulea Sugar Mountain® Balalaika™ *Balalaika™ Sweetberry honeysuckle*

NEW! Easy to grow backyard fruit! Hardy, and much more adaptable than blueberries, this native shrub produces abundant sweet fruits up to 1" long and 0.5" wide. This is an excellent pollinator for Sugar Mountain Blue haskap; best fruiting will occur when two varieties are planted together. Proven Winners.

H: 60-72" W: 60-72" Zones: 3-6

Lonicera caerulea Sugar Mountain® Eisbar™ *Eisbar™ Sweetberry honeysuckle*

NEW! This high yielding selection produces very big fruit - up to 1.5" long and 0.5" wide. Use as a companion plant to Sugar Mountain® Blue for improved fruiting. Proven Winners.

H: 60-72" W: 60-72" Zones: 3-6

Lycium

Lycium barbarum Big Lifeberry® *Big Lifeberry® Goji Berry*

NEW! Grow superfruit in your own backyard! Big Lifeberry has extra-large fruit, perfect for home cooks. Goji berries are easy to grow in full sun, although some staking may be necessary for maximum access to the nutrient-rich fruit. Add it to home gardens, or grow it in a patio pot. Proven Winners.

H: 10-12' W: 5-7' Zones: 5-8

Prunus

Prunus avium 'Black York' *Black York Cherry*

NEW!

FRUIT:

Pyrus pyrifolia 'Twentieth Century' to *Ribes rubrum* 'Pink Champagne'

Ribes 'Red Lake'

Ribes spp. (JostABerry)

Pyrus

Pyrus pyrifolia Twentieth Century *Twentieth Century Asian Pear*

NEW! Highly productive, this Asian Pear selection will load up with rounded, slightly oblong fruit that matures to a golden color and features crisp, white tasty flesh. Perfect for fresh eating or for canning, this fruit keeps well and will add high color to the backyard garden with its spring bloom and brilliant fall foliage display Goodness Grows Edibles.

☀ H: 30-35' W: 20-25' Zones: 5-9

Ribes

Ribes Red Lake *Red Lake Red Currant*

'Red Lake' is appealing not only for its fruit but for its compact, mounding habit and glossy green foliage that makes a stand out ornamental shrub. This selection produces long, pendulous clusters of greenish-yellow flowers that bloom in late April and early May. Flowers give way to long, pendant clusters of bright red Currants, which ripen in July. 'Red Lake', although tart, may be eaten ripe off the shrub, but are perhaps more often harvested to make jams, jellies and pies. Currants are very high in vitamin C and cancer preventative antioxidants. Birds of all kinds love the berries and they will fight you for the ripe fruit if the plant is not covered for protection. No serious insect or disease problems plague this easy care plant but good airflow is important to combat the troublesome powdery mildew. 'Red Lake' is not a host for White Pine blister rust.

♀ H: 3-5' W: 3-5' Zones: 3-8

Ribes spp. Jostaberry

Talk about hot, this cross between the American Gooseberry and the European Black Currant has produced one of the most written about fruits of the last few years and one that is so easy to grow in the backyard garden. This vigorous, easy to grow shrubby plant can produce up to 10 to 12 pounds of deep purple, nearly black berries on a mautre plant. These prolific berries are tart and sweet at the same time and loaded with Vitamin C and antioxidants. Jostaberry can be used fresh, baked, juiced or in preserves...they are so versatile and so great tasting its amazing more people aren't growing them!

♀ H: 5-7' W: 3-4' Zones: 3-8

♀ H: 5-7' W: 3-4' Zones: 3-8

Ribes rubrum Pink Champagne *Pink Champagne Currant*

Get ready for great tasting Currants with a twist...different color and different flavor!! 'Pink Champagne' is a cross between White Currant and Red Currant that yields a fruit that is white with a distinct pink blush. To go along with the different color, 'Pink Champagne's' taste will also surprise you with a luscious sweetness that makes it great for fresh eating. While not as tart as Red Currant, 'Pink Champagne' is still a surefire winner when it comes to preserves, jams and jellies just like the rest of this family. Even better, this selection is the perfect home edible garden plant with its dense, full form, its very low maintenance nature, and its extremely high yields for such a compact plant. You'll be picking 'Pink Champagne' by the containerful once this plant gets established!

♀ H: 3-5' W: 3-5' Zones: 3-8

FRUIT:

Rubus 'Anne' to Rubus 'Heritage'

Rubus

Rubus Anne *Anne Raspberry*

If you like fall bearing Raspberries, 'Anne' is your choice for the best fall bearing yellow Raspberry. Think of 'Anne' almost a yellow version of the old red favorite fall bearer, 'Heritage'. 'Anne' offers the same big, sweet berries in big numbers in the spring and fall just like 'Heritage' only in a pleasing yellow, firm berry that your taste buds will thank you for. Like all Raspberries, 'Anne' is easy to grow in any sunny location... just give it space so you can pick easily and so this wide grower does not overfill a small space.

H: 5-7' W: 5-7' Zones: 4-8

Rubus Baby Cakes™ *PPAF Baby Cakes™ Dwarf Thornless Blackberry*

NEW! Baby Cakes is a dwarf, thornless blackberry perfect for container gardening with its compact habit. Spring and early summer bring bright white flowers. In summer, large, sweet berries present on top of the plant in a fireworks-like spray of fruit. The plant has a somewhat round shape with upright growth reaching 3-4' in height. In most regions, this blackberry will produce twice with a mid-summer floricanne crop and a mid-fall primocane crop. The later crop is sometimes inhibited by high summer temperatures so gardeners in areas with hot summers may need to rely primarily on the floricanne fruit. - Brazelberries®

H: 3-4' W: 3-4' Zones: 4-8

Rubus Black Satin *Black Satin Thornless Blackberry*

NEW! You'll hardly be able to stand the anticipation while waiting to pick the first ripe berries from this selection of Thornless Blackberry!! When early August rolls around, it will be hard not to keep from salivating just at the thought of these large, jet black, tasty berries. The fruit is only the end product of a plant that is one of the best of its type for the home edible garden. 'Black Satin' is vigorous and pest free making it extremely easy to grow in your garden. The thorn-free stems make picking a friendly, bloodless job that will reward you with oodles of berries on each stem, all of them in danger of never making it into the house since their great taste will have you eating while you pick! 'Black Satin' will love a sunny spot with well-drained soil and will only ask you for enough room to spread so it can offer you its bountiful yield. Goodness Grows Edibles.

H: 5-7' W: 5-7' Zones: 4-8

Rubus Caroline *Carolina Raspberry*

Vigorous and productive, this selection of red raspberry sets the standard in its grouping for the best in fruit size and productivity. You will never come back in the house empty handed during the late July through August harvest period of this plant unless you eat everything you pick before you come in! That's a distinct possibility considering how highly sugared the berries are ... even with the massive quantities this plant produces, you may want to wolf them down before waiting to bring them in to share! 'Caroline' is a fast grower and will ramble so give it some room in any sunny or partially shaded location with good drainage.

H: 4-6' W: 4-6' Zones: 4-8

Rubus Chester *Chester Blackberry*

A thornless blackberry that yields a productive crop of large, very sweet, high quality fruit. The hardiest thornless blackberry, it does fine in all of Zone 5, and has good resistance to cane blight. Ripens in July.

H: 4-6' W: 4-6' Zones: 5-8

Rubus Heritage *Heritage Red Raspberry*

Red raspberry with flavorful fruit, producing one crop in mid July and another in early September. Flesh stays firm even when over-ripe.

H: 5-7' W: 5-7' Zones: 4-8

Rubus Baby Cakes™

Rubus 'Black Satin'

Rubus 'Caroline'

Rubus 'Chester'

Rubus 'Heritage'

FRUIT:

Rubus 'Jaclyn' to

Rubus Jaclyn *Jaclyn Raspberry*

Get ready for a blast of intense flavor every time you eat one of the many Raspberries you'll pick from 'Jaclyn'. This vigorous improved variety will knock you out with its great size and firmness, its distinct dark red color, its fall bearing nature that gives you fruit both in the summer and into the early fall and, of course, that taste which is outstanding especially if you fight your anxiousness to eat and leave it on the plant until it is completely ripe!! Plant 'Jaclyn' in any sunny location and give it plenty of space to satisfy its large, vigorous nature and your ability to pick! Goodness Grows Edibles.

☼ H: 4-6' W: 4-6' Zones: 3-8

Rubus Jewel *Jewel Black Raspberry*

Excellent quality black raspberry. Fruit is large, glossy black with superb flavor. 'Jewel' is more disease-resistant than other black raspberry varieties.

☼ H: 4-6' W: 4-6' Zones: 4-8

Rubus Polana *Polana Raspberry*

The worst thing about raising everbearing raspberries would have to be an early frost, especially in colder, northern areas. While 'Heritage' is the standard bearer for everbearing raspberries, 'Polana' is better as you go further north with late season fruit ripening up to 3 weeks earlier than 'Heritage', offering you a long season of luscious, large, glossy red berries without the worry of losing them to frost just as they are hitting their prime. Tasty! easy to grow and raspberries in July and again in late August... it's a home fruit grower's dream!! Goodness Grows Edibles.

☼ H: 5-7' W: 5-7' Zones: 3-8

Rubus Raspberry Shortcake® *PP22141 Raspberry Shortcake® Raspberry*

Revolutionary! There is no other word for this Raspberry that is a quantum leap ahead of the competition. Dwarf and rounded, this thornless beauty tops off at only 3' in height while producing a boatload of sweet tasting mid season red Raspberries in June and July. While it does spread like other Raspberries in the ground, it is perfectly suited for growing in a container on a deck so that you can pick delicious fruit at your leisure. Gone are the Raspberries that take over the landscape! Start a berry revolution in your garden today! Bushel and Berries™.

☼ Zones: 5-9

Rubus idaeus Himbo Top *Himbo Top™ Raspberry*

What a name! No matter what the name, Himbo Top™ seems destined to become your edible garden favorite for loads of reasons. First, it's an improved everbearing variety meaning that it bears up to 2 weeks earlier than old school everbearers like 'Heritage' making far better for higher yields in cooler northern areas where early frost can wreak havoc with a fall berry harvest. Second, the berries look like they on steroids with huge size and bright red color along with strong skin which make them far more resistant to bruising when picking. Third, the flavor is outstanding making it great for using fresh or in jams, jellies or preserves. Fourth, it is a heavy yielding plant producing a big harvest that will give you your fill of berries and more! Finally, since Himbo Top™ fruits heavily on new wood, you can prune the plant vigorously each year and avoid some of the plant diseases that can overwinter on lesser selections. Overall, despite the crazy name, Himbo Top™ has the goods to be your favorite Red Raspberry!

☼ H: 5-7' W: 5-7' Zones: 4-8

Rubus idaeus Meeker *Meeker Red Raspberry*

NEW! This tried and true selection was developed by Washington State University back in 1967 and features brilliant red fruit that is highly sweet and perfect for home gardeners. Aggressive growing, expect a great July harvest after a strong May flower bloom.

☼ H: 4-10' W: 3-10' Zones: 5-8

FRUIT:

Sambucus canadensis 'York' to Strawberry 'Tristan'

Sambucus

Sambucus canadensis *York* *York Elderberry*

Produces heavy crops of extra large fruit clusters, maturing 1 to 2 weeks after 'Adams'. Fruit is high in Vitamin C and individual fruits are the largest of any variety. Vigorous shrub 8-10'.

🌿 H: 8-10' W: 8-10' Zones: 4-8

Strawberry

Strawberry Allstar *All Star Strawberry*

NEW! One of the all time favorite home gardening varieties, 'Allstar' is the garden star of June bearing varieties producing an abundant crop of large, sweet flavored light to medium red fruit in early to mid-June. Fruit is fairly firm and excellent for freezing, canning or just eating right off the plant! Goodness Grows Edibles.

H: 6-8" W: 12-18" Zones: 4-8

Strawberry Earliglow *Earliglow Strawberry*

NEW! This old time selection is still one of the most sought for the home garden because of its heavy fruit set and because it is the earliest variety to set and mature fruit in the garden. 'Earliglow' is a vigorous plant that will runner well and, to go along with its heavy, early setting and maturity, has a taste that will always have you coming back for more of its bright red, medium sized tastiness. It's perfect for eating fresh or freezing and will be a welcome addition to your home garden! Goodness Grows Edibles.

H: 6-8" W: 12-18" Zones: 4-8

Strawberry Flavorfest *Flavorfest Strawberry*

'Flavorfest' is an exciting advancement for backyard berry growers as well as the professional berry farmer. Extreme disease resistance is paired with deliciously flavored, large plump berries. Good option for organic gardeners with excellent disease resistance.

H: 4-6" W: 12-16" Zones: 4-8

Strawberry Seascape *Seascape Strawberry*

You'll be eating strawberries all season long with this very productive everbearing selection that gives you a multitude of medium to large berries starting in June. Fruit is firm and sweet tasting and will work perfectly for freezing or eating fresh. Goodness Grows Edibles.

H: 6-8" W: 12-18" Zones: 4-8

Strawberry Sparkle *Sparkle Strawberry*

This delightful berry is so bright it sparkles on the vine. 'Sparkle' has been famous in the home garden for excellent flavor and high quality and small to medium sized berries that are perfect for jams and freezing. An extremely vigorous variety, 'Sparkle' is an excellent choice for beginning gardeners as well as old pros along with pick-your-own operations because of its high yields and great taste. A further advantage enjoyed by 'Sparkle' is that its later blooms will usually escape early frosts without injury making it one of the best choices for more northern gardens. These bright red Strawberries mature in late June and will be ready for you to eat by the handful! When planting, be sure to give them plenty of room to spread since overcrowding can cause reduced berry production as the plants age. Goodness Grows Edibles.

H: 6-8" W: 12-18" Zones: 3-8

Strawberry Tristan *Tristan Strawberry*

As beautiful as it is tasty, this everbearing selection produces an endless array of colorful, deep pink flowers followed by loads of sweet, bright red, cone shaped berries. Runnerless and compact, it is the perfect Strawberry for a container or hanging basket. Goodness Grows Edibles.

H: 8-10" W: 15-18" Zones: 5-9

Strawberry 'Allstar'

Strawberry 'Earliglow'

Strawberry 'Flavorfest'

Strawberry 'Seascape'

Strawberry 'Sparkle'

FRUIT:

Fragaria alpina 'Alexandria' to *Vaccinium corymbosum* 'Blue Ray'

Strawberry alpina Alexandria Alpine Strawberry

You'll be thrilled by the productivity and vigor of this runnerless selection that is an aggressive grower along with an aggressive fruiter. Loads of bloom grace this plant in early to mid May followed by a remarkable number of dime sized, sweet fruit that mature in orange and red color. Unlike standard Strawberries, 'Alexandria' will continue to bloom and fruit throughout the summer and, because of its runnerless nature, it is an outstanding plant to use in a hanging basket or a container on a deck. Its fruit is great right off the plant or perfect for fresh desserts...just add a bit of sugar to really bring out its taste and juciness! Sara's Superb Herbs.

H: 6-12" W: 10-15" Zones: 5-9

Vaccinium

Vaccinium angustifolium Lowbush Blueberry

This native blueberry produces sweet, dark blue berries from mid-to-late summer and has an open, airy form befitting a shrub border or native garden environment. Dainty white flowers cover the bush in May, and its dark green leaves put on a magnificent autumn show as they transform to a reddish-bronze color, making this a great selection for both taste and aesthetic purposes.

☀️ 🌿 🍷 🍷 H: 6-24" W: 18-24" Zones: 2-8

Vaccinium angustifolium Burgundy Burgundy Lowbush Blueberry

Selected at the University of Maine for its amazing red fall foliage color, this native plant goes beyond fruiting...it's an outstanding landscape plant that just happens to produce an amazing amount of small, deep blue, tasty fruit in July. Beyond being a gastronomic delight for humans and for landscape critters of many sizes and species, 'Burgundy' is a great plant for massing in sunny, well drained, sandy locations that allow it become an unbroken swath of beauty with deep green foliage in the summer followed by a red foliage display in fall that will make you think the ground is ablaze! Even in winter its burning red stems provide a blazing contrast to the snow!

☀️ 🌿 🍷 🍷 H: 8-12" W: 2-3" Zones: 2-8

Vaccinium corymbosum 'Sweetheart' Sweetheart Highbush Blueberry

NEW!

☀️ 🌿 🍷 🍷 H: 4-5' W: 4-5' Zones: 5-8

Vaccinium corymbosum Berkley Berkley Blueberry

Vigorous and rounded, this selection is a strong, dependable producer of mild tasting, medium-sized, powder blue fruit that mature in mid season. A superb fall foliage show and bright yellow winter twig color add to the landscape attractiveness of this selection.

☀️ 🌿 🍷 🍷 H: 5-6' W: 5-6' Zones: 5-8

Vaccinium corymbosum Blue Gold Blue Gold Blueberry

What a way to cap off the Blueberry season in your edible landscape! 'Blue Gold' is the perfect last Blueberry of summer with its pleasing nickle sized fruit, its firm, sweet yet tart taste and its propensity to fruit in huge quantities as if to give you as much great fruit as you can handle until the next Blueberry season! 'Blue Gold' fruit is great for fresh eating, preserves and baking and it certainly give you plenty of fruit starting in early August. Along with being a heavy fruiter, 'Blue Gold' is an outstanding landscape specimen for partial to full sun with great foliage, form, profuse, white, bell-shaped May bloom and what many think is as striking an orange to red fall color as any fall foliage plant you could grow.

☀️ 🌿 🍷 🍷 H: 5-6' W: 4-5' Zones: 4-8

Vaccinium corymbosum Blue Ray Blueray Blueberry

An old stand by, mid-season fruiting variety, 'Blueray' is an outstanding yielder with loads of large, powder blue berries and a great taste that will always have people looking for more. This selection's upright, open form displays stunning burgundy fall color and outstanding winter stem color.

☀️ 🌿 🍷 🍷 H: 6-7' W: 6-7' Zones: 4-8

FRUIT:

Vaccinium corymbosum 'Bluecrop' to *Vaccinium* x 'Jelly Bean®'

***Vaccinium corymbosum* Bluecrop** *Bluecrop Blueberry*

Consistent, easy to care for, and large, great tasting fruit... What more could you ask for in a blueberry?? This mid-season producer of great tasting blueberries has it all on an upright, open-growing bush that will be one of the best performers you've ever had in your fruit garden.

☀️ 🌿 🍷 🍷 H: 5-6' W: 5-6' Zones: 4-8

***Vaccinium corymbosum* Duke** *Duke Highbush Blueberry*

Start your blueberry picking season off right with this excellent selection that offers high yields and sweet, seductive taste on big, deep blue berries starting in early July. This slightly tart, very firm berry is perfect for fresh eating but also one of the best berries for freezing, allowing you to enjoy 'Duke' long after its profuse crop has been picked.

☀️ 🌿 🍷 🍷 H: 5-6' W: 5-6' Zones: 4-8

***Vaccinium corymbosum* Jersey** *Jersey Blueberry*

Big, burly, and productive, 'Jersey' is an old time variety that keeps on growing! 'Jersey' is laden with huge numbers of small- to medium-sized, sweet, dark blue fruit late in the season and is a consistent producer of perfect fresh eating or pie berries year after year.

☀️ 🌿 🍷 🍷 H: 6-7' W: 6-7' Zones: 4-8

***Vaccinium corymbosum* Patriot** *Patriot Blueberry*

We think this selection may be the best early season producer out there! Which other variety will give you such massive yields in such dense, rounded, compact package? 'Patriot' isn't only an incredible fruiting plant, it's an incredible landscape plant with superb, lustrous, deep green foliage and a fiery orange-red fall color that will stop you in your tracks!

☀️ 🌿 🍷 🍷 H: 4-5' W: 4-5' Zones: 3-8

***Vaccinium corymbosum* Polaris** *Polaris Blueberry*

Another small space wonder, 'Polaris' will thrill with its tight form, heavy producing ability and sweet, sweet berry taste. 'Polaris' is known as a 'half-high' type of Blueberry, combining the denseness of lowbush selections with the fruit size and larger berry yields of the highbush selections. The result is a plant that will cover itself with fragrant, white, bell shaped flowers in early May and with medium sized, powder blue, aromatic, extremely sweet tasting fruit in late July and early August. It is one of the earliest maturing of the Blueberries meaning that you might have to fight off more than the birds for its sweet fruit as hungry family members will be looking to outwit you for their year's first taste of fresh Blueberries! 'Polaris' is such a low maintenance plant and will even reward you and your garden with brilliant orange-red fall foliage color! Goodness Grows Edibles.

☀️ 🌿 🍷 🍷 H: 3-4' W: 3-4' Zones: 3-8

***Vaccinium* x *Jelly Bean*® PP24662** *Jelly Bean® Blueberry*

Everyone is looking for a dwarf Blueberry to use in the landscape but the varieties available invariably disappoint due to poor fruiting or poor growing. Jelly Bean changes all that in the form of a dense, compact, small leaved plant that produces masses of medium sized, dark blue, incredibly tasty blue berries in July and early August. It is so prolific and such an easy care, easy to grow plant that you won't know where to use it first, grouped to form a fruiting small, formal hedge in any sunny garden or in a container where you can pick right from your back door. Add in spectacular fall foliage color and you have a small Blueberry that will be a big winner in your garden. Bushel and Berries™.

☀️ 🌿 🍷 🍷 H: 1-2' W: 1-2' Zones: 4-8

FRUIT:

Vaccinium x 'Peach Sorbet® to Pinot Meunier Purple Dwarf Grape

Vaccinium x Peach Sorbet® PP23325 Peach Sorbet® Blueberry

Get ready for this easy to grow Blueberry that is as beautiful as it is productive. You'll love its landscape presence with its great foliage color as new leaves flush a distinct peachy orange color before turning dusky blue-green as they mature. Heavy blooming in May with masses of fragrant, bell shaped flowers, Peach Sorbet produces tons of large, tasty Blueberries in late July and August. If that wasn't enough to make you love it, Peach Sorbet finishes the season with a blast of fall foliage color that will have you groping for the right adjective to describe its beauty. Plant in full sun and enjoy the Blueberry fireworks year after year! Bushel and Berries™.

☀️ 🌿 🍷 🍷 H: 2-2' W: 1-2' Zones: 5-8

Vaccinium x Perpetua® PP24209 Perpetua® Blueberry

NEW! Perpetua is a true double-cropping blueberry that sets one crop of fruit in mid-summer, and then flowers and fruits a second time to provide ripe fruit in the fall. The leaves are dark green, somewhat shiny, and curly or twisted in the spring and summer, turning to deep reds and greens in the winter. The new canes are bright yellow and red in winter. Perpetua has smallish berries that are mild and sweet. Bushel and Berries™.

☀️ 🌿 🍷 🍷 H: 4-5' W: 3-4' Zones: 4-8

Vitis

Vitis Canadice Canadice Grape

It's hard to beat this grape for taste and ease of growth. You'll love its productivity in your backyard garden with compact clusters of large, seedless red grapes ripening in early to mid September. While they are incredible tasting eating them as you are picking them, 'Canadice' is versatile enough to be a tasty treat even in jams and jellies. Easy to grow, 'Canadice', like all grape vines, can get big and it could use a supporting, heavy duty trellis or pergola for best production and ease of care.

☀️ 🌿 🍷 🍷 H: 15-20' W: 15-20' Zones: 5-8

Vitis Concord Seedless Concord Seedless Grape

NEW! Dependability is without question on this easy to grow vine that will give you gobs of deep purple, sweet Grapes that have the added pleasure of being seedless. There may be no other Grape as multi purpose for you to grow in your edible garden as it's spectacular for fresh eating when harvest time rolls around in early to mid September or can be used in jellies and preserves with equal success. Like all heavy, woody vines, be sure to grow this selection with a strong wooded trellis or arbor for support in order to assure the best fruiting and health of the plant.

☀️ 🌿 🍷 🍷 H: 4-5' W: 18-24" Zones: 4-8

Vitis Lakemont Seedless Lakemont Seedless Grape

Large, tight clusters of crisp, juicy, sweet, yellowish green fruit. Excellent flavor and quality is high in acid. This superior grape makes excellent raisins. Vigorous, heavily productive vines. Flower buds are hardy to -10°F to help avoid damage due to late spring freezes.

☀️ 🌿 🍷 🍷 H: 3-5' W: 2-3' Zones: 5-8

Vitis Pixie Grapes Cabernet Franc Cabernet Franc Grapes

Amazing miniature clusters of grapes on a dwarf grapevine can be grown indoors or out—a small plant that's easy to care for with continual fruiting. This variety of grape is typically used to produce champagne or wine and can be enjoyed fresh, or used as a simple garnish. Sweet, tart flavor.

☀️ 🌿 🍷 🍷 H: 14-20" W: 8-12" Zones: 3-8

Vitis Pixie® Pinot Meunier Purple Pinot Meunier Purple Dwarf Grape

NEW! Expect to be amazed! These cutting-edge plants are “mini-me” versions of the dark-berried grape variety most famously used making Champagne. Although a workhorse in contributing fruity aromas to wines, you'll relish the sweet, few-seeded grapes fresh off the vine! Full grown at 18" to 24" tall. Non-GMO/GEO.

FRUIT TREE:

Amelanchier alnifolia to *Malus '4 In 1 Cold Climate'*

Amelanchier alnifolia

Amelanchier

Amelanchier alnifolia *Juneberry/ Saskatoon / western service berry*

Like the Amelanchier shrubs and trees that have been used ornamentally for years, Juneberry is one of the hardiest, easiest to grow, most attractive to wildlife plants you can grow in your edible garden. It is an upright growing, multi-stemmed plant that grows well in full sun or partial shade and tolerates sandy, somewhat infertile soils without batting an eye. Late April and early May sees Juneberry loaded with cloud-like plumes of small white flowers that are followed by delicious blueberry-like fruits starting in June into July. Juneberry is not specific about soil type but it does require moist soil to thrive. This delicious, unusual fruit can be used in pies, jam, wines, cider, beers and sugar-infused berries similar to dried cranberries used for cereals, trail mix and snack foods. High in antioxidants and low in the need for maintenance in the landscape, Juneberry will make an outstanding addition to your edible landscape

H: 12-14' W: 8-10' Zones: 2-8

Malus 'Winesap'

Diospyros

Diospyros x Nikita's Gift *Nikita's Gift Hybrid Persimmon*

NEW! Nikita's Gift Persimmon is easy to grow and typically starts producing fruit in 2 to 3 years after planting. Naturally compact it is the perfect addition to the collector's garden or the novice orchardist as it is rarely bothered by pests and diseases. It is a high producer (over 50 lbs) of sweet, flavorful, reddish-orange fruit in the fall. Plus the green foliage turns a beautiful rainbow or orange to yellow shades in the fall. Persimmons are widely planted across Asia because of they are delicious and easy to grow. Nikita's Gift is a cross between an Asian and an American persimmon. Although it is self-fruitful, a larger harvest is seen when planted near a male persimmon.

H: 12-15" W: 12-15" Zones: 5-8

Malus 'Yellow Delicious' *Yellow Delicious Apple*

Pink buds open to white flowers and pollinators will be buzzing to pollinate this nearly self-fertile apple. The fruit is ready to harvest in September and starts out as pale green, becoming a gold-green when ripe. The apple is crisp, juicy and sweet, especially nice for fresh eating, sauce and baking.

H: 8-15" W: 8-15" Zones: 4-9

Malus '4 In 1 Cold Climate'

Malus 4 In 1 Cold Climate *4 - in -1 Cold Climate Apple*

So you want to grow apples in your home edible garden but you don't have room for more than one tree and the guy at the garden center says you need at least 2 varieties to pollinate and get fruit?? Why not try a single tree that combines 4 varieties of apples on the same single tree? All your pollination and space concerns will melt away with the 4-in-1 cold climate apple is created from grafting from an assorted selection of cold climate hardy apples. These are the varieties that are used in the grafting: Braeburn, Cortland, Fuji, Gala, Granny Smith, Gravenstein, Jonagold, Jonathon, Melrose, Red Delicious, Red McIntosh, Spartan, Yellow Delicious, Yellow Transparent, and Winesap. Four of these varieties are grafted on the same plant!! Get ready for a bountiful harvest and outstanding variety all for the price of one....that's a bargain in any economy!

H: 12-15' W: 12-15' Zones: 4-8

FRUIT TREE:

Malus 'Braeburn' to Malus domestica 'Jonagold'

Malus Braeburn *Braeburn Apple*

(Semi-dwarf) This chance seedling found in New Zealand in the 1950s hit American shores in the 1980s and became a fruit stand classic for its great taste, crispness and long keeping ability. Unfortunately, it has not been readily available to the home fruit landscaper. That's too bad because it is a great Apple to grow but with a couple of quirks. While it is a mid-season bloomer that can be pollinated by many other Apple selections, Braeburn is one of the latest Apples to mature with the fruit taking into early to mid-fall to fully ripen. Braeburn also will flower like crazy as a youth but it will keep you waiting a couple seasons longer than most Apples to bear considerable fruit. These two quirks aside, you will find Braeburn to be the Apple of your eye featuring outstanding taste whether fresh or cooked, crisp, tart flesh, great storage ability and a multi-use nature that will keep your fruit hungry family begging for more!

☀️ 🌳 🌿 🍷 🍷 H: 12-15' W: 12-15' Zones: 5-8

Malus Cortland *Cortland Apple*

Semi-dwarf. 'Cortland' is a bright red, medium-sized apple bred from 'McIntosh' and a later maturing variety. The result is a crisp, slightly tart apple of high quality that ripens late season or late September in Zone 5. Blooms mid-season. An excellent all purpose apple developed at the Geneva Experimental Station in New York state.

☀️ 🌳 🌿 🍷 🍷 Zones: 4-8

Malus Rubens® PP14,177 *Rubens® Apple*

NEW!

☀️ 🌳 🌿 🍷 🍷 H: 10-15' W: 10-15' Zones: 5-8

Malus Snapp™ *Stayman Snapp(TM) Stayman Apple*

(Semi-Dwarf) Snapp™ Stayman is a bright red Apple with super crispy, yellow flesh that offers a flavor that can only be described as heavenly especially for those who like a tart Apple. Absolutely one of the best Apples for baking, ciders and sauce, this selection was discovered in the orchards of Alfred Snapp in Winchester, VA. Alfred was an experienced Apple grower and the color of this fruit caught his eye immediately. He found out that, not only was this fruit beautiful, but its quality was higher than many of the varieties he was growing all on a tree that was fantastically vigorous and productive. Snapp™ Stayman has sterile pollen so it does require another Apple planted nearby for cross pollination and it will not be a pollinizer for other Apples. Pairing it with another late harvesting Apple is perfect and will allow you to harvest these delicious Apples in mid October.

☀️ 🌳 🌿 🍷 🍷 H: 12-15' W: 12-15' Zones: 4-8

Malus Urban Golden Treat™ *Golden Treat™ Columnar Apple*

The ultimate small space tree, 'Golden Delight' produces huge amounts of golden fleshed, crisp, tart Apples in late August on a narrow, upright, almost bottle-brush looking plant that is perfect for container growing. Colorful bloom, needs a pollinator for fruit set. Goodness Grows Edibles.

☀️ 🌳 🌿 🍷 🍷 H: 8-10' W: 2-3' Zones: 4-8

Malus domestica 'Jonagold' *Jonagold Apple*

NEW! Get ready for a great harvest with this tree that features red w/gold colored fruit that is sweet yet tart and perfect for cooking, canning or eating fresh off the tree! This mid-September ripener is dependable and a great pollinator.

☀️ 🌳 🌿 🍷 🍷 H: 12-15" W: 12-15" Zones: 5-8

FRUIT TREE:

Malus X 'Northpole' to Malus X 'Royal Gala'

Malus X 'Northpole' Northpole Columnar Apple

NEW! Ever wanted to grow your own apples but were put off by the size of the tree? 'Northpole' makes apple growing easy in a very compact space since it rarely branches...all its fruiting occurs along its main trunk on fruiting spurs meaning you might even grow it in a container on a deck or patio! Even though 'Northpole' might look like an oddity, its fruit is anything but producing an ample harvest of sweet McIntosh-like fruit in August and September. Another apple variety in the neighborhood that flowers at the same time is all you need to get fruit on this space saving beauty!

☀️ 🌳 🌸 🍏 🍏 H: 8-10' W: 2-3" Zones: 4-8

Malus X Crimsoncrisp™ PP16,622 Crimsoncrisp™ Apple

NEW!

☀️ 🌳 🌸 🍏 🍏 Zones: 4-6

Malus X Fuji Fuji Apple

Semi-dwarf. A crisp and juicy apple that ripens in October and keeps very well in storage. The flesh is sweet and crisp and the light green skin with red blush is very attractive. Vigorous and productive, this variety was developed in Japan and it's outstanding for fresh eating. Pollinate with any mid-season blooming apple.

☀️ 🌳 🌸 🍏 🍏 Zones: 5-8

Malus X Honeycrisp Honeycrisp Apple

Semi-dwarf. Great for taste and even better for storage, this sweet-flavored late season selection retains its crispness even after seven months of storage! 'Honeycrisp' is not only becoming an orchard favorite, it is becoming a "must have" tree for the home fruit garden because of its versatility, taste and productivity as well as its remarkable ability to stay crisp for months.

☀️ 🌳 🌸 🍏 🍏 Zones: 3-8

Malus X Macoun Macoun Apple

Semi-dwarf. A favorite New England variety, this mid-season apple needs no introduction. Exceptionally high quality fruit are dark red and firm. Considered by many the best overall apple for fresh eating. Mid-season bloom.

☀️ 🌳 🌸 🍏 🍏 H: 12-15' W: 12-15' Zones: 4-8

Malus X McIntosh McIntosh Apple

Semi-dwarf. This apple has been around for 125 years and is still one of the most popular apples in the northeast. A very productive tree which yields medium-sized, bright red fruit with green background. With a tender, thin skin, these apples are good for fresh eating or cooking. Blooms mid-season and is self-fertile.

☀️ 🌳 🌸 🍏 🍏 H: 12-15' W: 12-15' Zones: 4-8

Malus X Red Delicious Red Delicious Apple

Semi-dwarf. Everyone loves 'Red Delicious', with its juicy and very sweet flesh. Good for fresh eating and salads. Blooms mid season and also ripens mid season. A vigorous growing tree. Resistant to fireblight and cedar rust.

☀️ 🌳 🌸 🍏 🍏 Zones: 5-8

Malus X Royal Gala Royal Gala Apple

Semi-dwarf. A deep red apple with sweet, crisp flesh that is perfect for both eating or cooking. Matures two weeks earlier than 'Red Delicious' and blooms in mid-season.

☀️ 🌳 🌸 🍏 🍏 Zones: 4-8

FRUIT TREE:

Prunus 'Goldstrike' to Prunus "

Prunus

Prunus 'Goldstrike' *Goldstrike Apricot*

NEW!

☀️ 🌿 🍷 H: 10-12' W: 10-12' Zones: 5-8

Prunus Arctic Glo *Arctic Glo Nectarine*

(Semi-Dwarf) Highly recommended for home orchards, this white-fleshed Nectarine has a flavor unlike any other with a unique sweet balance of sugar and acid that has scored very well in taste tests. Not only is the fruit of 'Arctic-Glo' memorable, so is its spring show with pretty pink flowers that nearly cover the branches in late April. 'Arctic-Glo' is self-pollinating and will produce a huge crop of ruby red skinned fruit that is ready for harvest in late July or early August without the benefit of another variety for pollination. Enjoy this semi-freestone fruit right off the tree but don't be surprised if it becomes one of your favorites for other dessert uses whether its cooking or preserving. Plant this smaller growing tree in full sun and on higher ground to avoid those late blossom killing frosts. Goodness Grows Edibles.

☀️ 🌿 🍷 H: 10-12' W: 10-12' Zones: 5-8

Prunus Blushingstar *Blushingstar® Peach*

NEW! (Semi-Dwarf) Get ready all you white Peach lovers! This selection from the acclaimed Stellar series of Peaches will thrill you with its toughness, ease of growth, bountifulness, and its great taste! Blushingstar® is a mid-season bloomer that loads up with perfectly beautiful pinkish-lavender flowers in late April or early May. Copious amounts of fruit develop quickly and mature in midseason (late July) to 2.5 to 3 diameter Peaches that are sweetly colored pink to red. The mature fruit looks tasty and when you cut it open to reveal its white flesh and to unleash its one-of-a-kind sweet aroma, you'll be hooked! Blushingstar® is a freestone selection and self-pollinating. Its vigorous nature and hardiness are a home orchard asset along with its excellent resistance to bacterial spot

☀️ 🌿 🍷 H: 12-15' W: 12-15" Zones: 5-8

Prunus Contender *Contender Peach*

It's true. Peach selection can be difficult if you are looking to raise them in a home orchard in the far north. Good thing 'Contender' is available to give you a great tasting peach that will shrug off your Zone 4 winters. This late July maturing, freestone peach will thrill you with its big size, its tasty juiciness and its ability to produce loads of these red blushed yellow fruit that are equally good fresh as they are canned or preserved for later use. 'Contender' is self-fruitful, easy to grow and a sure way to make your northern backyard feel like it's a little further south!

☀️ 🌿 🍷 H: 10-12' W: 10-12' Zones: 4-8

Prunus Coralstar® *Coralstar® Peach*

Coralstar® is a Peach that just seems to keep on giving. It has it all with huge 3 diameter fruit that is so pretty to look at with its bright coral-red skin and flesh that you might not want to take a bite. That would be a mistake because it is a deliciously sweet and firm freestone Peach that will have you salivating from the first scent of its sweet aroma! Adding to this selections great look and taste is its ability to produce...Coralstar® matures in late July and keeps on maturing fruit for the next few weeks giving you a longer period of picking, a great plus for the home edible garden. Even better, Coralstar® is easy to grow, keeps well when cooled, hardy, self-fruitful, resistant to bacterial spot and is one of the heaviest producers you'll ever find for you home edible garden! Goodness Grows Edibles.

☀️ 🌿 🍷 Zones: 5-8

FRUIT TREE:

Prunus 'Madison' to Prunus 'Satsuma'

Prunus Madison *Madison Peach*

(Semi-Dwarf) 'Madison' is a medium sized, bright red freestone Peach that, like 'Reliance', is recommended for northern climates for its excellent late frost tolerance and great cold hardiness as well as its wonderful taste. 'Madison' is self pollinating and will set a heavy crop of fruit, in fact, it may set so many that you'll want to thin them during the early part of their maturing season for the best and largest fruit at harvest. This high quality fruit has slightly fibrous, firm, orange-yellow flesh that tastes great and is very juicy! Because of its fruit is so tender you rarely see it in grocery stores making it all the better for picking off your own tree in mid-August! The fruit are excellent for slicing and having with a bit of cream or for any of your baking and canning recipes. It's bacterial spot tolerant and will thrive in sunny areas with well-drained soil! 'Madison' is vigorous and needs a little extra pruning yearly to maintain its vigor and productivity.

☀️ 🌿 🍷 H: 12-15' W: 12-15' Zones: 4-8

Prunus Mount Royal *Mount Royal European Plum*

NEW! Semi-dwarf. A blue plum, excellent for fresh eating, jams and preserves. Tender, juicy flesh. Considered by many the best blue cultivar. Ripens late August. A freestone variety that is self-fertile.

☀️ 🌿 🍷 H: 8-12' W: 8-12' Zones: 4-8

Prunus Redstar *Redstar® Peach*

(Semi-Dwarf) This Peach is not just another pretty face although you will be impressed by its burning red skin that jumps off the tree against the background of deep green foliage. It's likely you'll be far more impressed by the taste of these 2.5 - 3" diameter, firm, yellow fleshed, mostly freestone Peaches...they have a tart tang to go along with their sweetness that makes them stand out above the crowded Peach field. Even better, Redstar® is a strong producer giving you all you can handle and more in the harvest department when they mature in midseason around late July. You can eat them fresh, use them in pies or preserves or just keep them in a cooler for a refreshing snack as fall approaches. Redstar® is self-pollinating, quite hardy and resistant to bacterial spot and canker making it a great choice for your home edible garden.

☀️ 🌿 🍷 H: 0-0" W: 0-0" Zones: 5-8

Prunus Regina *Regina™ Cherry*

(Semi-Dwarf) Experience a breakthrough with this Sweet Cherry that has great taste to spare on fruit that is much firmer and split resistant than most other selections in this group. Regina™ is a late blooming, late harvesting selection that can be pollinated by another late bloomer like Bing but will have fully ripened fruit 10 to 14 days later than Bing. You will find the wait well worth your time as a mammoth crop of large, dark red skinned and fleshed fruit will have you giving away its sweet bounty by the bagful. Regina is the result of German breeding work so its constitution is more than robust enough for our climate while its taste will make it a house favorite for fresh eating, canning or freezing or even using in pies. Be sure to cover your tree as the fruit ripens. While this is a somewhat arduous task, if you do not cover them you will have the happiest birds in the world as they feast upon your super sweet Regina™ Cherries! Goodness Grows Edibles.

☀️ 🌿 🍷 H: 18-25' W: 18-25' Zones: 5-8

Prunus Satsuma *Satsuma Plum*

(Semi-Dwarf) Here is a Plum that looks as good as it tastes! You'll marvel at this Japanese Plum's outstanding color with striking red skin that looks beautiful on the tree at maturity in mid-August. The real revelation comes when you cut open one of these beauties...its firm, red flesh is incredibly juicy and very sweet tasting as it melts in your mouth! It would be hard to find anything better tasting right off the tree fresh but Satsuma is versatile enough to be just as tasty when cooked or preserved. The real bonus of this medium sized fruit is the fact its pit is far smaller than many Plum varieties giving you even more sweet flesh to greedily consume. Satsuma is vigorous and easy to grow and needs another Japanese Plum selection to pollinate it in order to set fruit. Goodness Grows Edibles.

☀️ 🌿 🍷 H: 10-15' W: 10-14' Zones: 5-8

FRUIT TREE:

Prunus X " to Prunus X 'Black Tatarian'

Prunus Shiro *Shiro Plum*

Semi-dwarf. This vigorous, hardy plum is so productive that it will make your mouth water! 'Shiro' is a Japanese selection that ripens in mid-July bearing loads of medium sized, juicy, dark yellow plums that are perfect eating right off the tree. A great addition to the home orchard!

☀️ 🌿 🍷 H: 8-10' W: 8-10' Zones: 5-8

Prunus Sweetheart *Sweetheart™ Cherry*

(Semi-Dwarf) Vigorous to a fault, this new selection of Sweet Cherry is perfect for the home orchard because it is self-fruitful requiring only itself to produce copious amounts of fruit. Added to its self-fruitful nature is its great taste and firm skin that resists cracking, the bane of growing any Cherries! Sweetheart™ lives up to its name and is most memorable because it is the latest of producers in your home orchard with fruit that matures right around the first of August. Its bright red skin and flesh, unlike many Cherries, will turn its final color before its ripe so resist the urge to pick fruit when the color seems just right to you...give it a couple extra weeks on the tree for best taste. And, its taste is fabulous making it one of your favorites for eating fresh or using in preserves. Make sure you cover your tree as its fruit matures to ward off marauding birds trying to steal your sweet fruit! Goodness Grows Edibles.

☀️ 🌿 🍷 Zones: 5-8

Prunus persica Canadian Harmony *Canadian Harmony Peach*

Introduced to America in 1968, 'Canadian Harmony' Peach is an early to midseason ripener that matures about 16 days after 'Red Haven'. This selection is a strong producer of large freestone fruit with excellent shelf life and a taste that is sweet but with a bit of acidity to balance it out. This hint of acidity makes it great Peach for canning, preserving or for pies. While it might not be the prettiest Peach, what 'Canadian Harmony' lacks in the way of magazine cover appeal, it certainly makes up for in flavor. Once you take a bite of out of this juicy, delicious fruit straight off the tree, taste, not beauty, will be foremost in your mind! Even better than its outstanding taste, 'Canadian Harmony' is one of the hardiest Peaches available making it perfect for growing in those northern areas where Peaches are sought after but rarely grow well. 'Canadian Harmony' is self-fruitful making it perfect for edible gardeners with limited space resources.

☀️ 🌿 🍷 H: 10-12' W: 10-12' Zones: 4-8

Prunus X 'Bing' *Bing Sweet Cherry*

Semi-dwarf. Most widely grown sweet cherry. Large, dark red fruit is produced on this vigorous growing tree. Firm and meaty flesh is purple and freestone. Pollinate with 'Black Tatarian', or 'Stella'. Does not pollinate with 'Lambert'.

☀️ 🌿 🍷 H: 18-25' W: 18-25' Zones: 5-8

Prunus X 'Stanley' *Stanley Plum*

Fruitful and dependable, 'Stanley' is as decorative as it is productive, with a dense, rounded form and an extremely profuse, fragrant show of single white flowers in early May. The whole tree may be completely obscured by this bloom that lasts up to 2 weeks with countless small fruit following soon after the bloom passes. This fruit grows and finally matures in September, producing a tasty prune-type plum that has purple skin, yellow flesh and a high sugar content that is great fresh or dried. 'Stanley' is self-fruitful so it is self-sufficient in producing its huge crop of tasty plums.

☀️ 🌿 🍷 Zones: 5-8

Prunus X 'Stella' *Stella Sweet Cherry*

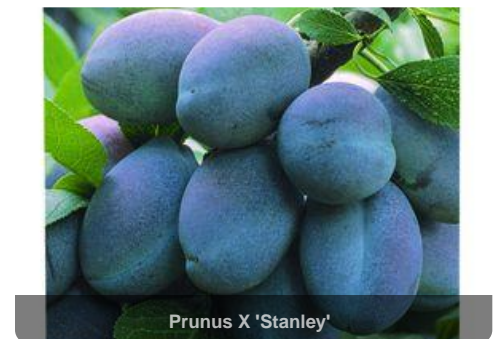

Semi-dwarf. Large, heart-shaped, dark red fruit are produced on this self-pollinating sweet cherry. Sweet, rich flavor on a vigorous, productive tree make this an excellent choice. Moderate crack resistance. Can pollinate other sweet cherries.

☀️ 🌿 🍷 H: 18-20' W: 18-20' Zones: 5-8

Prunus X Black Tatarian *Black Tartarian Cherry*

Semi-dwarf. Vigorous, erect grower. Heavy bearer of large, bright purplish-black fruit. Tender, juicy and very rich. Requires any sweet cherry for pollination.

☀️ 🌿 🍷 Zones: 5-8

FRUIT TREE:

Prunus X 'Elberta' to Prunus X 'Lapins'

Prunus X Elberta *Elberta Peach*

Semi-dwarf. This spreading tree produces large, firm peaches ripening late August. Golden yellow blushed with red. A freestone peach that is self-fertile and resistant to brown rot.

☀️ 🌿 🍷 H: 10-14' W: 8-12' Zones: 5-8

Prunus X Flavortop *Flavortop Nectarine*

(Semi-Dwarf) This selection is one of the old standbys for nectarines with good reason. If you are looking for dependable, productive trees that produce a steady, delicious crop of juicy, sweet fruit year in and year out, 'Flavortop' is the plant you need. Self-fruitful without the need for additional nectarine trees for pollination, 'Flavortop' bursts into bloom with pinkish-purple flowers in late April and early May quickly followed by small fruit. These fruit rapidly enlarge as spring stretches to summer so that by early to mid July, you are ready to harvest large, firm yet juicy nectarines with yellow flesh and cheery red skin. Be ready to start eating and canning because 'Flavortop' will keep you busy with all that sweet fruit that's perfect for fresh eating, baking and preserves.

☀️ 🌿 🍷 H: 10-12' W: 10-12' Zones: 5-8

Prunus X Goldcot *Goldcot Apricot*

(Semi-Dwarf) 'Goldcot' produces a great crop of early, medium sized, nearly round Apricots in early August. These delicious fruits are freestone and have a tough golden yellow skin that protects them from easy bruising. 'Goldcot' fruit is fine for fresh eating, but truly shines as a canner since the flavor, texture and the golden color go through the canning process better than most other Apricots without a loss of quality. Apricots like 'Goldcot' contain carotenoids which are antioxidants that help prevent heart disease, reduce "bad cholesterol" levels and protect against cancer. 'Goldcot' is somewhat self-fruitful but for best yield, plant (2) or more together or plant another selection of Apricot nearby. You won't mind planting more since the trees are gorgeous in late April, covered with pink blossoms, and ornamental in summer with their furrowed bark and heart-shaped, glossy leaves. Plant in full sun for the best fruit production.

☀️ 🌿 🍷 H: 15-20' W: 15-20' Zones: 5-8

Prunus X Independence *Independence Nectarine*

As dependable and as early to fruit as any Nectarine available, 'Independence' sets the standard in Nectarines for the home garden with a tree that is tough enough to grow well and tender enough to produce outstanding numbers of large, gold brushed with red fruit in mid-July. It will be hard to resist eating these backyard delights right when you pick them with their sweet golden flesh and their juicy nature that will have you looking for a sleeve to wipe your face! Like all Nectarines, 'Independence' blooms early so it should be protected against April and May frosts. Self-fruitful.

☀️ 🌿 🍷 H: 10-12' W: 10-12' Zones: 5-8

Prunus X Lapins *Lapins Sweet Dark Cherry*

(Semi-Dwarf) If you love the idea of having a Cherry tree in your yard but only have room for a single tree then 'Lapins' is the one for you! 'Lapins' is self fertile meaning, unlike many other sweet Cherries, it doesn't need another Cherry to produce a bumper crop of delicious fruit each year. Starting in late April or early May, its branches will be covered with beautiful white flowers. As the flowers fade, small green Cherries take their place and mature through the summer into extra large, mahogany fruits that are ready for harvest in late July and early August. These Cherries are crisp and sweet and are one of the best, high quality dessert Cherries available perfect for pies, preserving or drying. If you do have other Cherries planted, 'Lapins' is an excellent early blooming pollinator and is very easy to grow. Make sure you cover the tree as fruit ripens so the birds won't steal most of your Cherries!

☀️ 🌿 🍷 H: 15-20' W: 15-20' Zones: 5-8

FRUIT TREE:

Prunus X 'Montmorency' to Prunus X 'Tomcot'

Prunus X Montmorency *Montmorency Cherry*

A plant with a storied American history, 'Montmorency' is, by far, the most widely grown 'sour cherry' or 'pie cherry' tree in America with nearly 100 years of fruiting history. Vigorous growing, 'Montmorency' is a heavy spring bloomer with clouds of small white, fragrant flowers followed up by a bumper crop of sizable cherries that mature in July and August. Perfect for pies and baked goods, these cherries are also quite good eating fresh especially if left on the tree until almost overripe to attain the highest sugar content possible. Once picked, the fruit doesn't last long but its perfect for preserves and jams. Self-fruitful.

☀️ 🌿 🍷 H: 12-20' W: 12-20' Zones: 3-8

Prunus X North Star *North Star Cherry*

Dwarf. Grows 6-9 ft. Hardest cherry, produces heavy crops of bright red fruit with a small stone. Disease-resistant and self-pollinating, this tart cherry is excellent for pies and preserves.

☀️ 🌿 🍷 Zones: 4-8

Prunus X Redgold *Redgold Nectarine*

(Semi-Dwarf) The very flavorful 'Redgold' is one of the most well known of all Nectarines and one of the most rewarding for the home orchard. It's a large, glossy, highly colored fruit with deep red skin and firm, very sweet and very juicy, golden yellow, freestone flesh. It stores well and tastes delicious making it a favorite for fresh eating even though it stands out in preserves and other dessert recipes. 'Redgold' ripens in mid-August and its nice rounded form is perfect for planting under telephone wires or in urban landscapes because of its compact size and tolerance to urban pollution...it's been known to thrive in inner city conditions, its only requirement being well-drained soils and sunlight! Fragrant pink flowers load up the branches in late April really putting on a show. Even better, 'Redgold' is self-fruitful allowing it to produce large crops of Nectarines without having to have another pollinating variety nearby.

☀️ 🌿 🍷 H: 10-12' W: 10-12' Zones: 5-8

Prunus X Redhaven *Redhaven Peach*

Semi-dwarf. Heavy bearing, well-formed tree. Resists cold and is tolerant to leaf spot. This vigorous grower ripens in late July in Zone 6. Beautiful red and golden yellow, medium-sized fruit is round, uniform and appealing. Disease-resistant and self-fertile.

☀️ 🌿 🍷 Zones: 5-8

Prunus X Reliance *Reliance Peach*

Standard. One of the hardest of all peaches, ripens mid to late August with greenish yellow coloring and a slight blush of red. Flesh is bright yellow, soft and juicy. Good for fresh eating, especially in colder climates. Freestone and self-fertile.

☀️ 🌿 🍷 Zones: 4-8

Prunus X Santa Rosa *Santa Rosa Plum*

Semi-dwarf. This Japanese variety is a vigorous, fast growing plant that produces large crops of beefy, round fruit with thin, purple-red skin. This tart, sweet fruit ripens in mid-August and is excellent for fresh eating and canning.

☀️ 🌿 🍷 Zones: 5-8

Prunus X Tomcot *TOMCOT APRICOT*

NEW! (Semi-Dwarf) The Tomcot™ Apricot is a consistently good producer of yellow fruit with a ruby blush where the sun has touched the skin. It's a vigorous selection and partially self-pollinating meaning it will set considerable fruit on its own in your backyard garden but would set far heavier crops if pollinated by another selection of Apricot. It's an early maturing Apricot producing luscious fruit for you to pick and eat right off the tree in late July and early August. While its fruit will be tasty preserved it holds up best as a dessert quality Apricot that will have you drooling for more! Plant Tomcot™ in spots where spring frosts are less frequent because its massive pink bloom in late April or early May can be damaged causing poor fruit set. All Apricots love full sun and well-drained soil.

☀️ 🌿 🍷 H: 15-20' W: 15-20' Zones: 5-8

Prunus X 'Montmorency'

Prunus X 'North Star'

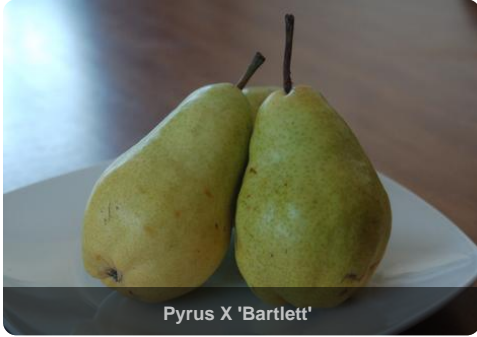

Prunus X 'Redgold'

Prunus X 'Redhaven'

FRUIT TREE:

Pyrus 4-in-1 combo round to Pyrus X 'Red Bartlett'

Pyrus

Pyrus 4-in-1 Combo 4-in-1 Fruiting Pear

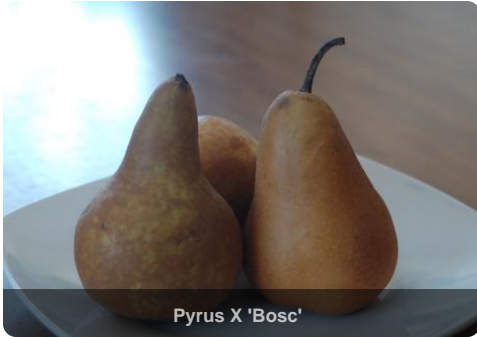

NEW! Four delicious pears are grafted onto one plant, making pollination a breeze and assuring great fruit set on one plant for the home gardener. Four pear selections on one tree means guaranteed fruit while saving space in the landscape. Variety selections marked on each branch. The varieties grafted could be 4 of these varieties: Bartlett, Comice, d'Anjou, Flemish beauty, Hood, Kieffer, Luscious, Red Bartlett, Seckel.

⚙ H: 15-18' W: 12-15' Zones: 5-8

Pyrus communis x pyrifolia 'Pineapple' Pineapple Pear

NEW! You'll wonder where this heirloom Pear has been all your life once you taste its juicy, pineapple-like flavor when it matures in August! Great taste and plenty of it with big, red blushed yellow Pears that are perfect for canning and preserves too.

⚙ Zones: 5-9

Pyrus X Bartlett Bartlett Pear

Semi-dwarf. This vigorous, productive tree bears fruit at a young age which ripens well on the trees. Fruit is large, golden-yellow, with a wonderful quality. Buttery, juicy, highly flavored fruit.

⚙ Zones: 5-8

Pyrus X Bosc Bosc Pear

Semi-dwarf. This vigorous grower is also a vigorous producer with an exceptional crop of large, russeted fruit maturing in early October. 'Bosc's' tender flesh and smooth texture is perfect for fresh eating while also being well suited for canning and preserves.

⚙ Zones: 5-8

Pyrus X Moonglow Dwarf Moonglow Pear

One of the best Pears for the home garden, 'Moonglow' is so easy to grow with its disease resistant nature. On top of that, it also is one of the best producers in the backyard orchard delivering basket upon basket of medium to large sized, dull yellow brushed pink fruit that features the least gritty white flesh of any Pear with a sweet, juicy taste that makes it ideal for fresh eating or canning. 'Moonglow' fruit matures from mid August to mid September and can be pollinated by any other non-Asian Pear.

⚙ H: 15-18' W: 10-12' Zones: 5-8

Pyrus X Red Bartlett Red Bartlett Pear

This Aussie created selection arrived on US shores in 1959 and has been a backyard fruiting favorite ever since. It's easy to see why with its great fruit size, taste and versatility. This big, deep red skinned Pear matures starting in late August and continuing into late September producing a fruit that is very sweet and juicy with a white flesh that delivers a bit of grittiness that adds to the eating experience without being bothersome. 'Red Bartlett' is very productive and very easy to store for later use in baking projects and is one of the ideal Pears for canning. 'Red Bartlett' can be pollinated by any other non-Asian Pear

⚙ H: 15-18' W: 10-12' Zones: 4-8
