9ft Inline Unit (IL-9)
(3ft or 6ft also available)

High-end 4 or 8 Channel
Controller

Friction Feeder Unit
(Vacuum feeder also available)

Stacker Unit

Storage

Control Panel
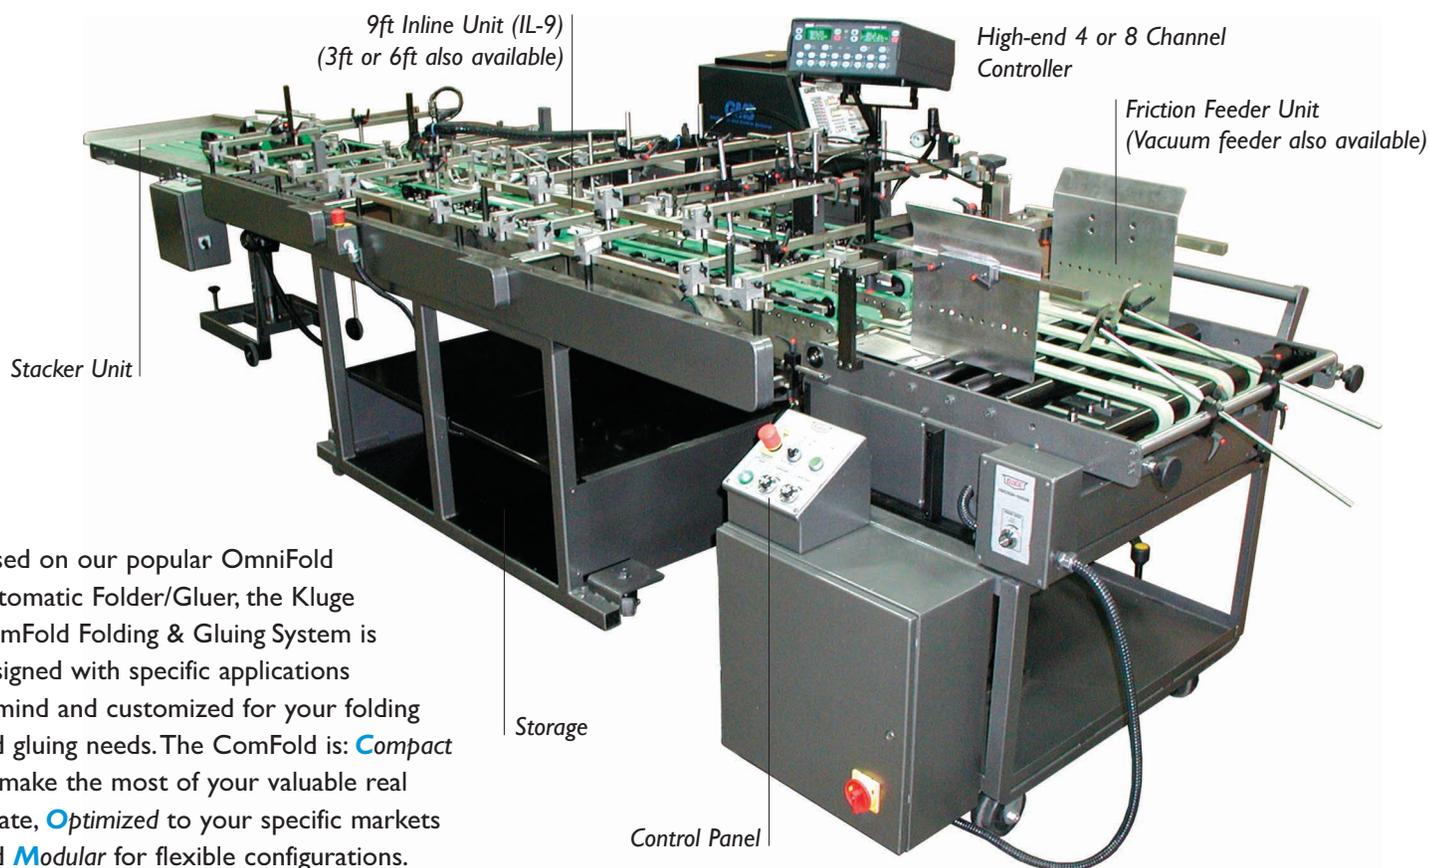

Based on our popular OmniFold Automatic Folder/Gluer, the Kluge ComFold Folding & Gluing System is designed with specific applications in mind and customized for your folding and gluing needs. The ComFold is: **C**ompact to make the most of your valuable real estate, **O**ptimized to your specific markets and **M**odular for flexible configurations.

Modules and features

- Friction Feeder - Stock is fed from the bottom of the pile using sheet separator calipers and belts
- Vacuum Feeder - Includes dual vacuum wheels and blow pipes. Tool-less technology allows for simple manifold position adjustment.
- Electrical Controls - From the control panel, the user can operate the start, stop, jog and speed controls of all modular sections
- High-end 4 or 8 Channel Controller - Used to operate a variety of devices such as hot or cold glue and taping heads
- 3ft (IL-3), 6ft (IL-6) and 9ft (IL-9) Inline Units - Kluge Inline Units provide additional converting length. This feature provides the base unit to which accessories can be fixed.
- Stacker Unit - Compresses, counts & batches finished product
- Fold Hook Kit - For various auto-lock bottom applications
- Multiple Friction Fed Tipping and Placing Options
- High-speed Automatic Tape Head
- Airgate Folding Kit
- 18" and 33" Top Belt Drives
- Hot, Cold and Fugitive Glue Systems
- CE Compliance Package

Common applications

- **Cartons:** Standard side seam cartons, cartons with internal integrated partitions, tuck top, auto-lock bottom, very small cartons and very narrow cartons
- **Media and Mailing:** CD/DVD jackets, sleeves, wallets, and other carriers, with or without tape, small return envelopes, fold-over reply cards and greeting cards sealed with fugitive glue or velcro
- **Tipped and Inserted Products:** Cartons created around preconverted items, CD/DVD carriers created around CDs and other items, products created around tipped-on items such as credit/gift cards and postcards using fugitive glue
