ADVANTAGES

- Temperature Range
-40° - 248°F (-40° - 120°C)
- Chemical Resistant
- Abrasion Resistant
- UV Light Fade Resistant
- 360° Visibility
- No Pipe Preparation Required
- No Minimums on Stock or Custom Orders
- No Set Up Charges on Custom Orders

System #4 Pipe Markers™ are used to identify piping systems in industrial environments that are expected to reach higher temperatures or harsh exposure to chemicals. Both, the arrows & legends are printed repeatedly in opposite directions allowing the marker to be applied in any direction achieving proper reading while indicating pipe content flow.

- Sizes: 4A, 4B, 4E and 4F are constructed using white polyester with a clear polyester overlam. These markers are affixed to themselves with a clear high performance UV resistant sealing flap.
- Sizes 4G & 4H are polyester labels mounted to a .032 thick high temperature aluminum carrier.
- Graphics are completely sealed in 2 layers of polyester. Polyester offers superior chemical and temperature resistance to vinyl markers.
- Sizes 4A, 4B, 4E and 4F offer 360° visibility.
- Sizes 4G and 4H are secured to pipes using stainless steel strapping.

(S.S. strapping and nylon ties are sold separately, see pages 30 and 31).
