

## Princess

Princess is doing great! She is perfect in every way and we are blessed to have her in our family. She is well mannered, highly intelligent, sweet and we absolutely love her!

When she first arrived, she evidently considered our three cats to be strays and it took a couple of weeks for her to warm up to them. They now are friends and in fact the kitties now lay on her and rub against her. She also had no experience with

horses and saw them as a threat but now understands they are also part of our family and no longer barks at them but instead just watches them. Our neighbors have a herd of goats which she thoroughly enjoys barking and charging at them to make them run away from the fence.

She is very active and alert and enjoys her time outside in the mornings and evenings with us. She gets along great with Jack

(our pug/brussels griffon dog) and they play together. He enjoys her company and is actually losing some weight due to all the activity with her (which is a good thing as he was overweight).

It is hard to believe that she is actually eight years old because she is so active and healthy. She has never had an accident in our house and loves to be brushed. I brush her daily. We plan to take her to the lake soon so she can swim as I saw on her paperwork that her previous owner had noted she liked to do that. She does have a peculiar habit that I have never seen in a dog before. She puts her paw in her mouth as if she is a child sucking her thumb. It puzzles me why she would do this although it is pretty cute :).

We cannot imagine how it must have felt for her family to have to part with her and our hearts go out to them. If you can, please let them know how she is doing and that she is very loved and well cared for!

Thank you so much for allowing us to bring Princess into our lives!

Don and Juanita Moreno
