## **SURGERY WITH DR. AHMED BAZZI**

Your child has been scheduled for surgery at Corewell Health - Royal Oak Campus. Several days prior to surgery you will receive a telephone call from the admissions office to complete the pre-admission process. You will receive a 2nd call from the Anesthesia Department to review your health history. Lastly, the hospital will call you the day prior to your surgery to discuss arrival time, where to arrive and give any additional instructions for the day of surgery.

### **Please review the following protocols for pre-surgical fasting (also referred to as your NPO status):**

Newborns to 12 months of age may have breast milk up to 4 hours before the assigned arrival time or formula and cow's milk up to 6 hours before the assigned arrival time. Additionally, clear liquids, including water, Pedialyte or apple juice may be taken up to 4 hours before the assigned arrival time.

Patients over one year of age may not consume any food after 10:00pm the night prior to surgery. You may have clear liquids up to 2 hours before the assigned arrival time including black coffee or tea (no milk or cream), apple juice, ginger ale, 7-Up or Sprite are also allowed.

### **Additional Instructions:**

- Please make sure not to take any aspirin, anti-inflammatories (such as Ibuprofen, Advil, Motrin, Aleve, Naprosyn, Mobic, Celebrex), vitamins, or supplements 10 days prior to surgery unless otherwise instructed by Dr. Bazzi.
- Please continue your Vitamin D and Calcium if placed on it peri-operatively.
- Wear loose fitting clothing to the hospital.
- Someone must remain on hospital grounds while the patient is under anesthesia.
- If you develop a cold, flu or illness within one-week of surgery, contact Dr. Bazzi's office.
- No smoking/vaping after midnight prior to surgery
- If applicable, please make sure you bring documentation establishing proof of guardianship

**FOR SCOLIOSIS PATIENTS, YOUR PRE-OPERATIVE BLOODWORK MUST BE COMPLETED 72 HOURS PRIOR TO SURGERY AT ONE OF SITES LISTED IN THE SURGICAL PACKET**

**\*\*You may visit <https://www.beaumont.org/services/childrens/pre-surgery-education> for additional surgical information\*\***

We hope these instructions will address any questions or concerns you may have as you prepare for surgery. If you need to reach us please call **(248) 655-8501** during business hours or email Dr. Bazzi at [email@drbaazi.com](mailto:email@drbaazi.com). For the follow-up appointment after surgery, please call **(833) MOS-DOCS**.

Additional clinic locations for Dr. Bazzi:

West Bloomfield Clinic | 33200 West 14 Mile Rd | Suite 220 | West Bloomfield, MI 48322

Novi Clinic | 26750 Providence Parkway | Suite 220 | Novi, MI 48374

## **Showering With Chlorhexidine**

### **When will I be using the Chlorhexidine Gluconate: (Brand Names: Aplicare, Hibiclens)?**

You will use the Chlorhexidine for two days prior to surgery and on the morning of surgery, One shower each day.

### **Why will I be following a special showering procedure?**

The use of chlorhexidine gluconate 4% skin cleanser has been shown to decrease bacteria (germ) levels on the skin and may reduce your risk of surgical infection.

### **Where do I purchase 4% Chlorhexidine Gluconate?**

You should be able to purchase this product at your local pharmacy.

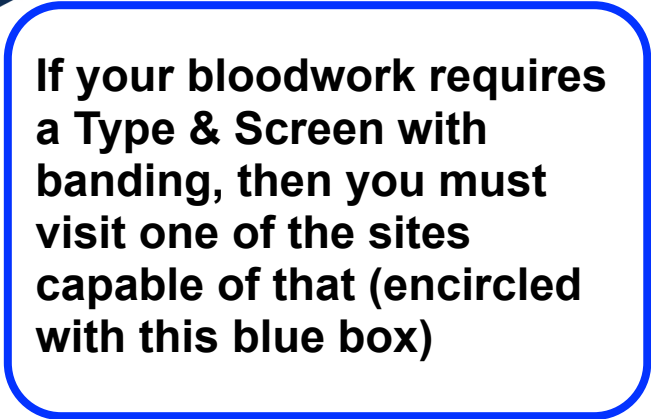

### **How do I perform the Chlorhexidine shower?**

You will need a clean bath towel, clean terry washcloth and a 4oz bottle of Chlorhexidine Gluconate 4% skin cleanser.

1. Wash and rinse hair with your regular hair products
2. Wash and rinse face and then genitals using your regular soap product
3. Moisten entire body and step away from the shower stream
4. Wet a clen terry washcloth and apply two tablespoons of Chlorhexidine Gluconate skin cleanser to the cloth. It is important to use a clean washcloth each day. Avoid use of back brushes, sponges, foaming puff, etc., you may have in your shower. These may add bacteria to your skin.
5. **Cleanse entire body from neck down. Do not use this product on the face, ears, eyes, mouth, genitals, or open wounds.**
6. Step back in the shower stream and rinse thoroughly.
7. Dry gently with a clean towel
8. Do not apply creams, lotions, or powders to you skin after your shower.
9. Put on clean clothing, including underclothing and socks, each day.
10. Change bed sheets two days prior to your surgery so that you will be sleeping in clean sheets once you start the Chlorhexidine showering. One change of sheets is sufficient.
11. Important laundering advice: Chlorhexidine Gluconate (CHG) binds not only to the protein of skin, but also to many fabrics. Thus, special laundering procedures should be considered for fabrics coming in contact with the skin bathed in CHG, i.e., sheets, towels, and clothes. Wash these fabrics without the use of chlorine, since a fast brown stain may develop due to a chemical reaction between the CHG and chlorine bleach. Use of peroxide-type bleach, such as perborate, sodium percarbonate or hydrogen peroxide are recommended if a bleach agent is necessary.

## NATURAL SOURCES OF IRON

Meat/Protein	Plant Products	Vitamin C Sources
<b>Meat/Protein:</b> Beef Chicken Turkey Eggs Pork Fish Oysters Clams Liver	<b>Plant Products:</b> Prunes Dates Dried Apricots Watermelon  <b>Vegetables:</b> Dried beans/peas Kidney beans Lima beans Lentils Romaine lettuce Spinach Broccoli Parsley Avocado Beets Potatoes with skin Soybeans/Tofu  <b>Bread/Grains:</b> Iron fortified cereals Oatmeal Cream of Wheat Millet Wheat Bran Enriched breads/pastas  <b>Nuts/Miscellaneous:</b> Almonds/Cashews Pumpkin seeds Pistachios Pine Nuts Molasses	<b>Fruits:</b> Strawberries Oranges/juice Kiwi Mango Papaya Grapefruit/juice Tangerines Cantaloupe  <b>Vegetables:</b> Red/Green peppers Brussel Sprouts Broccoli Cauliflower Red Cabbage Potatoes Tomatoes Greens/Kale  <b>**Eat Vitamin C sources with Iron plant sources for better Iron absorption</b>
