

# When Simply Organic Just Isn't Enough

We didn't just stop at making the healthiest mattress in the world, we took it to the next level and revolutionized sleep! Our patented technologies allow us to make the only mattress that addresses the 6 key elements of Wholebody Recovery:

## Lifestyle

Organic mattresses, but better! Healthy, allergy friendly sleep surfaces at an affordable price.

## Performance

A step above. Reduce motion transfer & minimize pressure points in a clean air environment.

## Wholebody

Packed with Essentia technology, our patented Wholebody Recovery mattresses are unparalleled. Offering optimized support and boosting REM sleep.

### WHOLEBODY COMFORT

Our mattresses increase your blood circulation at night to eliminate numbness and soreness. All this translates to faster recovery so you can get back to enjoying life.

### OPTIMIZED SLEEP

REM and Slow Wave Sleep are sweet spots that keep your memory sharp. It's often unattainable if your body is jostled too much, like in an uncomfortable mattress. Essentia mattresses react with your natural movements and reduce sleep interruptions which get you in and keep you in these critical stages of sleep.

### PROPER POSTURE

A properly supported back at night translates to less or no pain during the day. Our mattresses eliminate negative space to relieve stress on the lumbar region.

### TEMPERATURE CONTROL

A sweaty sleep often translates to an irritating morning. Essentia foam wicks away heat, allowing it to dissipate through the mattress. You'll sleep on average 7 degrees cooler and avoid that 3rd cup of coffee.

### CLEAN AIR ENVIRONMENT

Your central nervous system goes into overdrive when exposed to chemicals in other mattresses. Our natural and organic mattress components reduce VOC exposure so your body can spend less time fighting and more time healing.

### ALLERGY FRIENDLY

Tested by Dr. Robert G Hamilton of Johns Hopkins School of Medicine. Essentia mattresses are proven to be impervious to dust mites and not cause latex allergies. Most allergy sufferers can rest easy knowing they won't be surrounded by allergens that may cause reactions.
