

Superbike brake line install

Installed front brake line on a Yamaha R3 equipped with an MT-03 top clamp and bars. I thought you might enjoy some install pics. I simply flipped the master cylinder connection and ran the line behind the fork tube where there is plenty of room at full lock.

I used the stock clamp with a piece of hose where the line passes the lower clamp and horn.

Spears Racing Manteca, Ca.

I also used the stock clamp at the fender stay

It flows nicely to the caliper.

Thank you,
Gregg Spears
