

Don't Reinvent the Wheel in Family Care/IRIS 2.0.

The Key Components of IRIS Will Keep Self-Direction Moving into the Future!

Please move the long-term care system forward with protections in place.

Public accountability for private insurance

- State oversight- IHAs to report data to DHS on services & expenses.
- Information available to taxpayers.

Focus on community services

- Incentives to keep people at home & out of institutions.
- Transportation services & community employment outcomes are critical.

Make it clear

- DHS communicates to IHAs the definition of self-direction & delivery expectations.

Map it out

- A state readiness plan should be in place before the new system goes live.
