

Good morning!

Are you and your partner(s) making the 'no weapons (no guns, no bow and arrows)' a part of your captain's meeting? YOU MUST do this EVERY game.

One reason why is [here](#).

It is hard to see if white 20 *points* at blue 25 after the made three-point shot or if he *shoots* him with his finger gun.

If it was a *point*, we have an automatic technical foul for taunting. If it is a *finger gun shot*, we have an automatic flagrant technical foul. The ejection would also be supplemental.

It can be argued that *pointing a finger* at the defender is most certainly a *finger gun*. We need to be aware of these types of actions. Even if they catch us off guard initially, we can still assess the penalties a few seconds after it has been processed. Even if T misses this and a partner sees it, we need to come and get it. These types of actions have been deemed unacceptable by the PIAA board of directors.

Tuesday extra: With the above in mind, are we having a captains meeting for EVERY game at EVERY level as we are supposed to? It does not take any extra time to have the meeting! It is part of the time preceding the game, so make sure to have a captains meeting for EVERY game!

Have a great game tonight!
