## The Outrigger+ Quick Start Guide

**The Outrigger + power panel has no user guide as such, however a few notes are important to observe safe operation.**

1. The panel is equipped with 4 standard Anderson Power Pole outlets that can be configured as input or output. We advise that the input DC voltage be connected to the Power Pole protected by a 30 Amp fuse. Do not be tempted to use the Barrel jack for power input unless the total power drawn across all other outputs does not exceed 5 Amps. Barrel jacks are rated to 5 Amps max.
2. The Banana Jacks are rated to 25 Amps, if these are used to supply or draw current to their max rating ensure a fuse of correct rating is installed at the position they are connected to.
3. The panel is rated to 45 Amps max. total draw, we recommend always being conservative and ensure the total draw on all outputs at any one time does not exceed 30 Amps, the inout fuse rating.
