R&D ABILITY

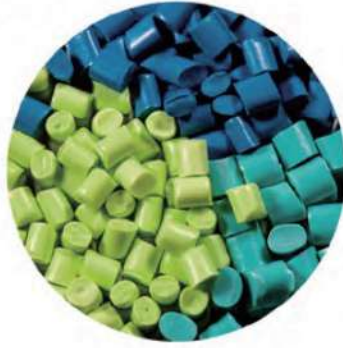

SPECIAL PARTICLE SURFACE

To meet the world demand and to protect the environment, more and more customers are looking for recycled plastic materials,our company also focus on collecting some advanced and sustainable polypropylene.

Now it has been applied to our mass production.The imported ocean plastic is made from ocean waste,after processed to be a kind of PP particle, and we also test other sustainable plant fiber materials such as wheat,bamboo , wood fiber and coconut fiber. The surface is special and pretty,most importantly ,it can help protect our earth and to make our living environment much better!
