BAUMANN cross - web labellers are designed for inline labelling on thermoforming and high speed clamshell packaging machines. They are able to run a wide range of label sizes and materials with high labelling quality. The labels are applied very precisely to the top and / or bottom of the pack. It can process labels of varying sizes and labelling uneven packs.

The CWL can easily be mounted on to most brands of thermoforming machines.

End-to-end solutions with in-house engineering, design and manufacturing capabilities.

- * Date coding
- * Empty pocket detection systems for empty packages.
- * Head to head label software
- * Bottom labeller with top mounted labelling head

The CWL cross web labeller has been recognized as a affordable economical solution in the packing industry.
