

RE: NEW COMPLIMENTARY CYBERSECURITY COMPLIANCE OFFER

We are delighted to announce that ELANY will be offering active members a complimentary new and exciting online tool to help excess line brokers comply with the New York Department of Financial Services' (DFS) cybersecurity regulation. Partnering with national security consultant Renaissance Systems Inc., we will be introducing *CyberCompass*[™] in the coming days. This tool will create a customized Risk Assessment report, identify weaknesses for remediation, deliver personalized cybersecurity policies and procedures documents, help manage third party service providers, and file annual DFS cybersecurity compliance certifications. These are key requirements of the regulation that must be met by all licensees, whether they have filed a limited exemption with the DFS or not.

ELANY will offer *CyberCompass*[™] at ELANY's expense to all brokers that both maintain an active New York excess line license and have filed an insurance policy document with ELANY since January 1, 2018. Expect to receive details, including how to enroll, shortly.

To whet your appetite, we invite you to check out this short [video](#).

All current ELANY bulletins and other current ELANY publications can be found on our website at <http://www.elany.org>.
