

SOLARAY®

DIETARY SUPPLEMENT

mycrobio™ probiotics designed for you

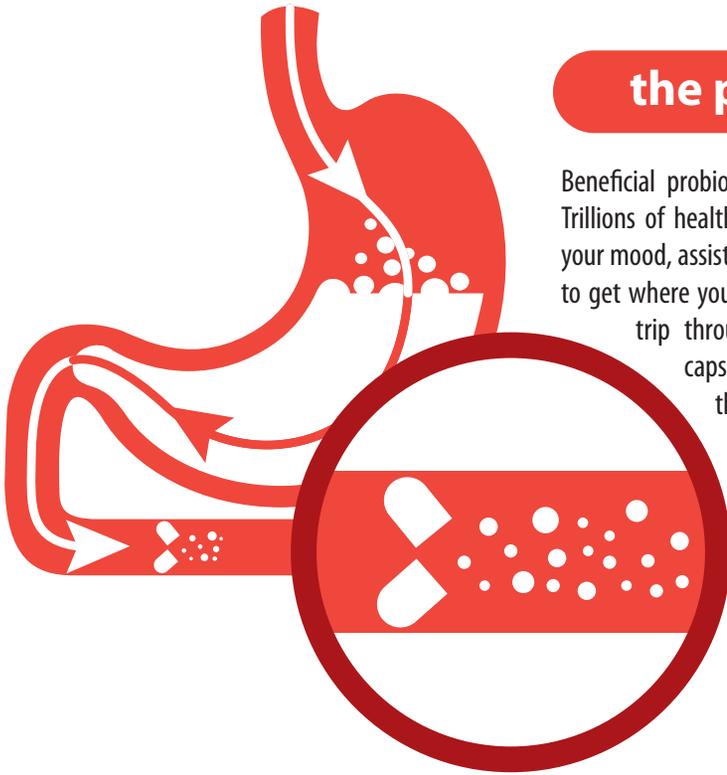

Probiotic Protection **GUARANTEED**

protect your probiotics

Stomach acid is harsh on probiotic cells and they need protection. Solaray® Enteric Shield™ VegCaps are designed to protect fragile probiotics. Our unique capsules are designed to remain intact for more than 60 minutes in stomach acid, then disintegrate in the small intestine.† Microbiome™ with Enteric Shield™ helps ensure your probiotics arrive safe and alive to where you need them.*

†USP (United States Pharmacopeia) 2040

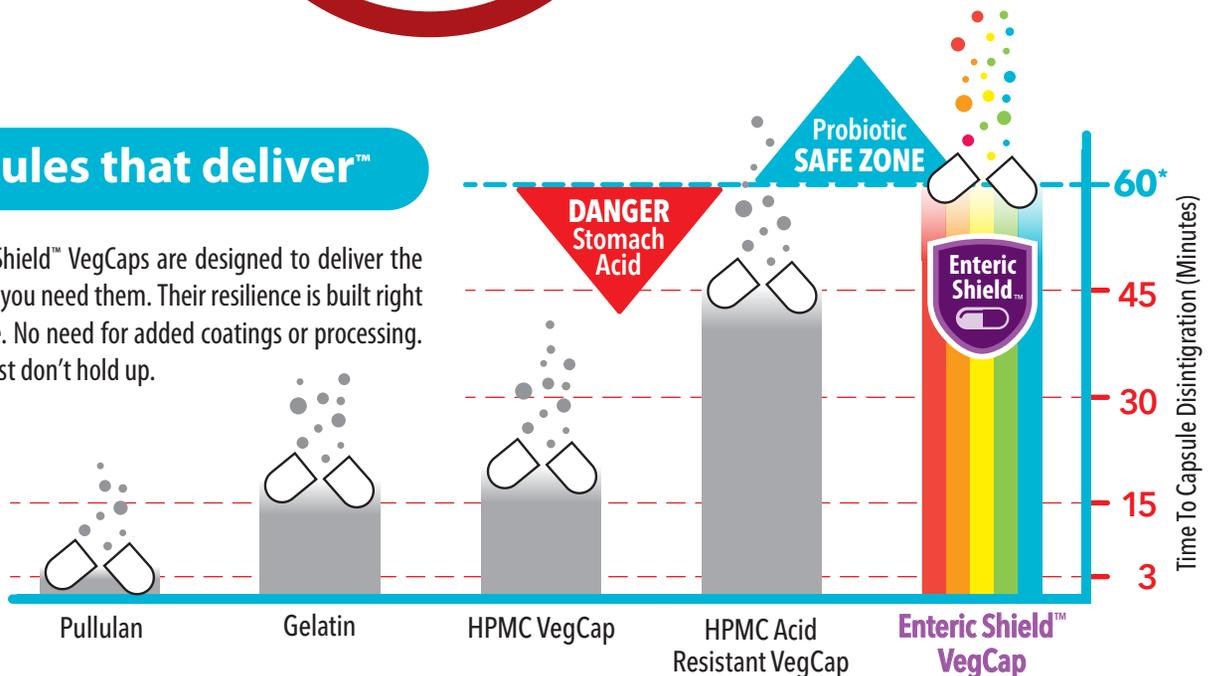

the perilous journey

Beneficial probiotic cells live and thrive in the intestines. Trillions of healthy bacteria help you digest food, regulate your mood, assist your immune system, and much more. But to get where you need them, the probiotics must survive a trip through acidic stomach acid. Enteric Shield™ capsules are designed and tested to last more than 60 minutes in stomach acid.* This guarantees the capsule has passed through the stomach and into the intestines before rupturing and releasing the probiotics.

capsules that deliver™

Solaray® Enteric Shield™ VegCaps are designed to deliver the probiotics where you need them. Their resilience is built right into each capsule. No need for added coatings or processing. Other capsules just don't hold up.

*Based on typical disintegration testing times using USP 2040. Individual results may vary.

WOMEN'S FORMULA

Probiotics have been called one of the best supplements for women. Microbiome™ Probiotic for Women is designed to provide 50 billion CFU of 24 probiotic strains.**
