

Test & Balance Services

...ensuring the function of your facility meets the requirements of your operations.

The accurate test and balance of a building ensures that the heating, ventilating, and air conditioning systems are operating at an optimum level. Bringing comfort to the building occupants while providing energy efficiency to the owner are a few of the key benefits of test and balance.

CEPro brings our significant resources and years of experience together with specialized training to ensure that the TAB projects we perform are completed on time, with accuracy and thoroughness. Our process is to test and balance HVAC systems to meet the design intent. A thorough review during procedure development will ensure the results are predicted and that inconsistencies are fully examined and remedied.

Our Test and Balance capabilities include:

- HVAC System Commissioning
- Duct Leakage Testing
- Air Systems—Testing, Adjusting and Balancing
- Professional Documentation and Reports
- Procedure Development
- Hospital Isolation Room Certification
- Total System Analysis
- Hydronic Systems—Testing, Adjusting and Balancing
- NIST-calibrated Instrumentation
- Equipment Startup
- Cleanroom Startup
- Laboratory Controls Troubleshooting
