## Couple Things

Social distancing will still be required as well as the possibility that you may need to have a mask. So you as the match participants need to be patient and understanding when you plan on attending our matches. We all want this to be a safe environment for all participants to enjoy and you need to respect others' concerns regarding the spread of this virus.

- Range capacity will be set at 24 shooters - 4 relays of 6 shooters. Please email me if you plan to attend, I will keep a running list of shooters.
- We are determining the best way to maintain distance while pulling targets. This may require a shooter to pull targets alone (one to a target) for two consecutive strings (max of 60 shots).
- Make sure and have exact change, do not hand me a \$20 and expect me to make change.
- Make sure you have a mask.
- If you think you have been around someone with COVID even if you do not have any symptoms do not come to the match.
- Bring sanitizer.
- Bring gloves if you feel that will help protect you.
- Do social distance.
