

# ColdSolve

## Cold Solvents

### PRODUCT DESCRIPTION

ColdSolve is a customized line of cold soak solvents that contain solvents, organic acid, wetting agents, dispersants, nano penetrants and inhibitors designed to remove organic and inorganic deposits in pipelines, process facilities, downhole tubulars, and reservoirs.

### BENEFITS & APPLICATIONS OF POLAR SOLVE

- Solubilizes and disperses paraffin and asphaltene deposits
- Solvent solubility improvers and penetrants are added to improve solubility and penetration rates
- Oil soluble organic acids enhance removal of oil coated and composite inorganic scale
- Cold Solve compositions are customized from crude oil or deposit compositions.

### PACKAGING

ColdSolve is available in 55-gallon drums (208-liter), transportable tote tanks or bulk loads.

### TREATMENT RECOMMENDATION

ColdSolve treatments are customized to locate, penetrate and solubilize pipeline obstructions with the lowest costs and minimum shut in time.

### TYPICAL PHYSICAL PROPERTIES

Appearance.....	Clear to Amber Liquid
Solubility in Water.....	Insoluble
Solubility in Oil.....	Soluble
