

CONVENTIONAL

Responds well to high management

Great grain quality

Good drydown

LG58C16 is a true “Race Horse” plant. A solid choice for cool soil planting in early spring, consider adjusting your agronomic strategy to align with your field’s yield potential with this choice. It responds well to fungicide and good fertility programs.

Growing Degree Days (GDD)

Pollen: 1334 Silk: 1320 Black Layer: 2700

Plant Rate Flexibility

28 - 36,000 Plants per Acre

## CHARACTERISTICS

Early Vigor	●●●●●●●●
Greensnap	●●●●●●●●
Drydown	●●●●●●●●
Staygreen	●●●●●●●●
Drought Tolerance	●●●●●●●●
Test Weight	●●●●●●●●
Harvest Appearance	●●●●●●●●

## MANAGEMENT

Low Populations	●●●●●●●●
Med Populations	●●●●●●●●
High Populations	●●●●●●●●
Marginal Soil	●●●●●●●●
Productive Soil	●●●●●●●●
Continuous Corn	●●●●●●●●
Adapt to No-Till	●●●●●●●●

## DISEASE TOLERANCE

N Leaf Blight	●●●●●●●●
S Leaf Blight	--
Gray Leaf Spot	●●●●●●●●
Goss's Bacterial Wilt	●●●●●●●●
Anthraxnose	●●●●●●●●
Southern Rust	●●●●●●●●
Fungicide Response	High
Tar Spot	Moderately Susceptible
Herbicide Interaction	--
