

Ashtead All Stars Health Screening Guidelines and Checklist

Per advice, we continue to require pre attendance self-health screening for all club members participating in club activities. This consists of assessing if they have any of the [main COVID-19 symptoms](#) (high temperature, a new continuous cough, a loss or change to sense of smell or taste). Individuals are also encouraged to other symptoms which may be less common.

If the participant has any of symptoms, they should not attend an activity and should take a COVID-19 test as per Government guidance.

Where a participant has symptoms of illness outside of the main COVID-19 symptoms or has individual or familial health concerns, they / their responsible parent or giver should make an informed decision based their own health and circumstances about being involved

Where a participant has been notified that they are required to self-isolate, they must not attend any netball activity until that period of isolation has ended.
