

MATERNAL POWER™
ANGUS BULL SALE

AT THE RANCH • FEB 15, 2020 • 3 P.M. • FORT RICE, ND

CATTLE THAT *Thrive* IN A GRASS-BASED, NO-FRILLS ENVIRONMENT

From the beginning, we've been laser-focused on producing Angus cattle that prosper in a no-frills environment: moderate-framed, high-volume, easy-fleshing, productive cows with good feet, great udders and a quiet disposition. We expect our cows to re-breed quickly and wean a calf that is a high percentage of its dam's bodyweight, year after year. Our cows have consistently increased weaning weights while increasing the percentage of cows that re-breed in the first 21 days. You won't find any lick tubs or creep feeders hidden behind the hills of our pastures. **Cattle that can do more with less – that's our definition of MATERNAL POWER™!**

From the beginning, we've also been very particular about the sires we select. **We hate surprises.** That's why we use a small group of proven, balanced-trait AI sires on our cows each year. We conduct a tremendous amount of research – evaluating the generations of genetics behind a bull, as well as his progeny – before we commit. A powerful, consistent cowherd cannot be built using a "little-bit-of-this-little-bit-of-that" strategy to sire selection. You must have a plan and a clear vision of what your ideal cow is.

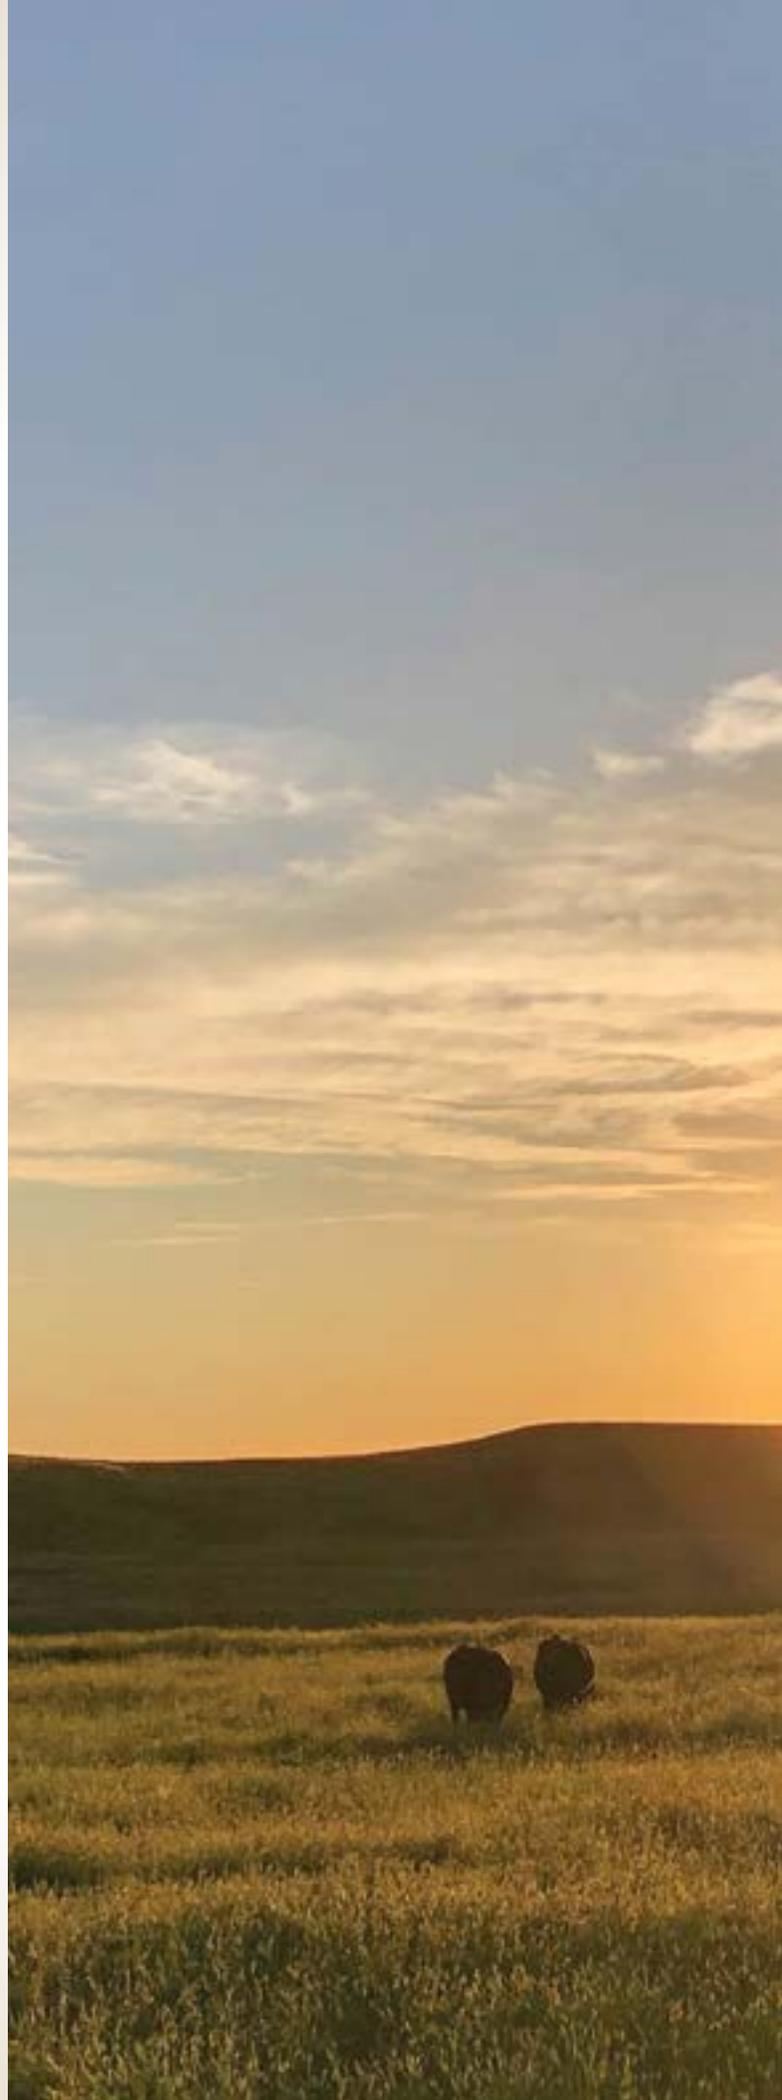

We know what it is like to start from scratch – and how important it is to make cattle work for you, instead of the other way around. As your seedstock provider, we want your operations to be profitable and sustainable for generations – regardless of the market. **We believe you can achieve this by developing your own herd of efficient, problem-free livestock backed by Strommen Ranch MATERNAL POWER™ Angus genetics.**

We invite you to our Maternal POWER™ Angus Bull Sale, **Feb. 15, 2020**, starting at 3 p.m. at the ranch, Fort Rice, N.D. Our bulls' pedigrees are stacked with six to eight generations of proven, balanced, female-making genetics and we stand behind them with an industry-leading guarantee, exceptional customer service, and a powerful, maternally oriented herd. 🐄

That's OUR DEFINITION OF
MATERNAL POWER™

AARON & SHEYNA
CASSIDY, COOPER & CLINT
(701) 290-7983 ·   
www.STROMMENRANCH.COM

A scenic landscape at sunset. The sun is low on the horizon, casting a warm, golden glow over the scene. The sky is filled with soft, wispy clouds. In the foreground, a herd of dark-colored cattle is grazing in a lush green field. The background shows rolling hills under the setting sun.

We are excited to present this year's offering.
It includes a great set of bulls from our
partnership with Reich Angus. The
selection of calving-ease bulls
is better than ever and the
selection of full, 3/4 or
1/2 brothers is better
than ever!

- Aaron

SALE ORDER • We will follow consecutive sale book order.

TERMS AND CONDITIONS • All animals sell under the standard terms and conditions of the American Angus Association. Terms of the sale are cash. Full payment is due on sale day, unless prior arrangements have been made.

BASE PRICE • All bulls will have a minimum price of \$2,500 sale day. Bidding will begin at the base price.

BULL DEVELOPMENT • These bulls have been handled correctly and developed without ANY creep. They have been fed just enough to express genetic differences, but not overfed as to compromise soundness or longevity. We want you to have a bull that will do his job and last for years. We believe our 90-day breeding season guarantee, detailed below, is among the best in the industry.

DISCOUNTS • We will offer a \$50/head discount if you purchased a bull last year and a \$50/head discount for volume purchases of 2 or more head.

EPDS • EPDs are current as of Jan. 18, 2020.

SALE TIME & LUNCH • The sale starts at 3 p.m. CST. Please join us for lunch beginning at 1 p.m. and remain with us after the sale for fellowship and refreshments.

FEEDING & DELIVERY • We will keep all bulls free of charge until delivery. Deliveries start May 1st. We ask that you work with us so that we can get bulls delivered in the most efficient manner. We will offer free delivery within 500 miles of the ranch.

HEALTH • All bulls have been on a complete health program as prescribed by Dr. Pat Bierman of the Mandan Vet Clinic, Mandan, N.D. Bulls have been given a vaccination for foot rot and will be boosted when they are fertility tested.

FERTILITY • All bulls will pass a fertility exam performed by Dr. Bierman before delivery.

LIABILITY • Anyone attending this sale does so at their own risk. Neither the owners nor anyone connected to this sale, assumes any liability, legal or otherwise.

SIRE GROUPS • For our customers who are looking to put together a set of closely related herd sires, we are offering many 1/2, 3/4 and full brothers. Groups are highlighted in the footnotes.

SIGHT UNSEEN PURCHASES • If you, for some reason, are unable to attend the sale, but wish to place a bid, feel free to call us and we will handle your bid as if you were here. If you wish to be on the phone during the sale, we will try to accommodate your request. Please let us know in advance so arrangements can be made. All sight unseen purchases are fully guaranteed.

DIRECTIONS TO THE RANCH • **From Cenex on Main Street in Mandan**, take Highway 1806 South 27.5 miles. Turn West onto County Road 135. Go West about 4 miles. The road curves South. Continue South 3.5 miles. The ranch is on the West side of the road. Roads will be marked. **From Solen**, go North on County Road 81 for 5 miles, then turn East onto County Road 134 for 7 miles.

Videos of the bulls are available on our website www.StrommenRanch.com

GUARANTEE • Strommen Ranch is very confident that we have developed these bulls safely. They have been fed just enough to express genetic differences, but not overfed as to compromise soundness or longevity. **We want you to have a bull that will do his job and last for years.** It is important to us that these bulls not only perform from birth to yearling, but from birth through breeding. It is with this confidence in our bulls that we can give our full 90-day breeding season guarantee. We understand that these are animals and that injuries do occur, but we have the utmost confidence that we have developed these bulls in the best way to protect your investment. If an injury or death occurs, Strommen Ranch will guarantee them for the purchase price minus salvage value (\$1,500), or we will provide a replacement bull, if a suitable bull is available.

We don't make you take out an insurance policy and add that to the purchase price. We don't have a formula to take away half of the value of the bull if injury occurs. At the same time, these are not 'disposable' bulls. We expect you to care for your investment in your Strommen Ranch bull, so that if a problem does occur, the most appropriate and timely care is taken. If the bull happens to get injured, or you are unsatisfied with your purchase for any reason, we want to know so we can take care of the issue in a timely manner. All injured bulls must be diagnosed by a veterinarian and any claims must be made by Sept. 15, 2020. **We are committed to our customers and your success.**

There are three things Torque does better than any bull we have ever used – he adds body length, improves disposition and he stands on a tremendous foot. He works great on those big-bodied, easy-fleshing females that need spine length and extension up front. He improves disposition and feet quality, all while maintaining maternal function and power. We feel the best is yet to come with the daughters he is leaving us.

We went to Bruin Ranch in California this fall to see the first daughters in production and to see his maternal sisters while they were wet and raising calves. To say the least, we were extremely pleased and tremendously excited about what his daughters will do for our program. We are enthusiastic about the impact he is having on our program. We will have nearly 80 Torque calves in the spring of 2020.

Torque's disposition is second-to-none. Before we took the top photo, we combed out his tail and wiped his face down with a wet cloth – all while he stood like a gentleman out in the pasture.

*“We place extensive **pressure on our cowherd** and ourselves to generate the right genetics that will **positively impact our customers' herds.**”*

Raindance is the bull we selected to use after seeing his first calf crop standout at a young age at Schaffs. We really like the bulls from a performance and body length standpoint and absolutely love the daughters we have. We think Raindance's strength will become evident in the ultra-feminine and broody daughters he will sire. They are clean-fronted with massive body volume and rib-depth, which will help them withstand extreme conditions and gives them the internal capacity it takes to break down poor quality forage and turn it into muscle and fat for survival in our sometimes harsh environment.

You will see more from Substantial in the future, as we are very pleased with his progeny. The calves had tremendous vigor at birth and we never assisted a single virgin heifer bred to him. The calves had laser-like focus on nursing and were very aggressive at getting on the teat. We have been told the daughters are great uddered and have tremendous structure. He is sired by Substance and out of a daughter of Territory. He has a negative Birth EPD and double-digit calving ease with tremendous ability to pass on good feet and large scrotal on his sons. We will have a good selection of Substantial sons in the next few sales.

Lot 8's dam is a full sister to the flush of Right Time X 804 bulls that were so popular in 2017. This performance prospect is out of arguably one of our best Right Time daughters that scores a perfect 10 for udder and disposition. A highly fertile cow, she has settled to AI service, first-cycle, every year and has a production record of WR 2/107. Lot 8 has a productive granddam, with a progeny WR of 6/113. He also has a Pathfinder great-granddam. A well-balanced EPD profile, and a no-holes maternal and performance history here! Bull brothers to Lot 8's dam are working in the herds of Dan Price and Dana Sippel, both of S.D., and K & L Ranch, Glenn & Vicki Gullickson and Ray Tescher, all of N.D. **A ¾ brother to Lot 9, both being out of Right Time daughters.**

Here's a tremendous opportunity to put together a set of flush brothers to make an excellent set of uniform heifer calves and a scale-pounding set of even feeder calves. This group of Torque sons out of 118 are long spined, big bodied bulls with muscle and masculinity. The maternal sisters we have in production are excellent. We have more than 40 calves registered from 118 with many more to come. This fall we froze another 38 embryos that will be implanted in the spring. Brothers to this flush are working for Luke Orr of Iowa; Casey Joens, Cody Thompson and Mark Van Dussledorp, all of S.D., Laurie Faber and Stepler Ranch, both of Mont., and Jim Cross, Dean Dvorak, Wayne Leier, Gary Siverson and Zillich Ranch, all of N.D.

Casey Joens of S.D. owns this maternal brother to Lots 17-20.

Zillich Ranch of N.D. owns this maternal brother to Lots 17-20.

PROVEN, BALANCED COW-MAKERS

Our cattle are backed by generations of proven, efficient genetics, emphasizing calving ease, fleshing ability, udder quality, disposition, structure and fertility.

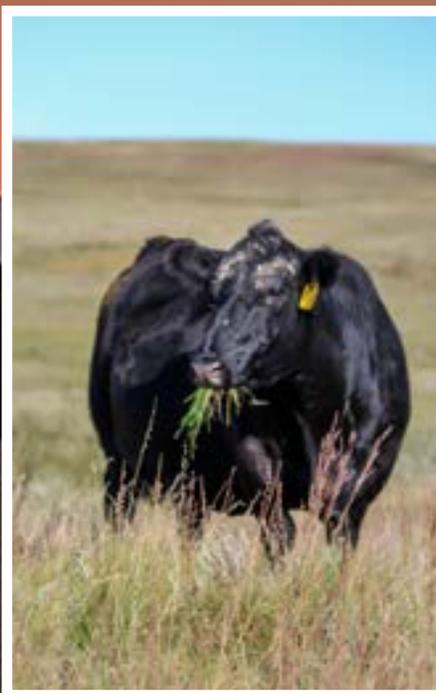

A BALANCING ACT:

Chasing fads or using one-trait selection is a really good way to hurt the important traits we all need to survive in the beef industry. The important traits every cowherd needs are fertility, longevity and fleshing ability, as well as sound feet, legs and udders. It is our intention to breed cattle that excel at certain traits, but not at the expense of other important traits.

- We want fleshing ability, but not at the expense of fertility.
- We want cattle to perform, but not to an extreme that it diminishes the cows' ability to breed back and maintain her condition in our environment.
- We want to continually improve weaning weights, but not with the expense of added input cost.
- We want cattle with acceptable carcass merit, but not at the expense of maternal traits.
- We select cattle that are moderate in frame, but we demand that they perform and have ample muscle.

This all sounds like a perfect game plan, but is really a juggling act of sorts. We do extensive research and appraise lots of cattle so that we can make the best informed decision about the genetics we bring in to keep our program moving in the right direction.

Every decision we make is based on our customers. If you won't benefit from our decisions, we won't benefit from our decisions. By taking a balanced approach to genetic improvement, we hope to manage our risk – and help you manage yours.

S R Clova Pride 725 is the maternal granddam of Lot 21.

Lot 22 is being sold by Cassidy, Cooper and Clint.

Another Torque son with built-in cow power behind him. His dam has a progeny WR of 3/102, an udder score of 7 and a disposition score of 9. His second-generation Pathfinder granddam has a progeny WR of 11/106 and his great-granddam also achieved Pathfinder status.

CUSTOMER SERVICE • We start by taking a balanced approach to genetics and by developing our bulls responsibly. Then, we stand behind our bulls with one of the strongest guarantees in the industry. But, that's just the beginning.

Because we are proud of the herds our customers are developing with Strommen Ranch genetics, **we offer our bull customers exclusive marketing assistance to capture additional value for their Strommen Ranch-influenced females.** We help customers promote their females through our exclusive Commercial Female Listing and the Badlands Angus Alliance Bull & Bred Female Sale in Dickinson. The Badlands Angus Alliance has become the premier sale in western North Dakota for source and genetic verified Angus replacement females, drawing interest from elite ranches across 6 states and demonstrating a strong demand for cattle with Maternal POWER™. **We invite you to take advantage of our Maternal Power™ Angus genetics, our unique customer service and the female marketing assistance we only offer to our bull customers!**

In December, Strommen Ranch customers consigned heifers that generated a \$200 to \$500 per-head premium over other bred heifer sales in the region!

S R Polly 804 is a foundation female for Strommen Ranch with more than 50 progeny born here and multiple sons employed as herd bulls in elite ranches throughout a 4-state region.

With over 50 progeny born here at the ranch and a progeny WR of 6/113, Polly 804 is certainly a cornerstone of our program. These Torque sons – combined with the Maternal Power™ of the Polly cow family – will be highlights of the sale. Her sons are working in some of the top herds in the region and her daughters have been retained. Sons are working for Pine Coulee Angus and Gene Ryg of Mont., Luke Orr of Iowa, Dan Price and Dana Sippel of S.D., and Jason Erickson, Glen and Vicki Gullickson, Roger Harstad, James Hornbacher, Bryce Leonard, Justin Lund, Cody Staiger, Ray Tescher and Steve Zenker, all of N.D.

S R Polly 768 is an Emulation XXP daughter out of S R Polly 804

Maternal brother purchased by Dan Price of S.D.. in 2017.

This Torque son could be used on larger heifers as the dam's production birth ratio and his EPDs indicate that he should be calving ease. This long, smooth-made bull has a balanced set of EPDs and good performance. His granddam was long-lived with a progeny WR of 14/100 and a 367-day calving interval. His great-granddam made Pathfinder status.

Over the years, our customers have encouraged us to increase the number of bulls we offer in our spring sale. This year, we are excited to be able to meet that request through a partnership we have formed with Reich Angus of Zap, N.D. Mardee Reich and her kids, along with Adron Doerr are continuing with the herd Jack and Delvin left and we are humbled that they have partnered with us to help bring you a larger selection of bulls. Included in this offering are the very top-end of Reich's maternally bred and reputation Angus bulls. The Reich team is raising the bulls from breeding through weaning, at which time, Strommen Ranch assumes possession and management. These bulls embody the same breeding philosophy as Strommen Ranch born-and-raised bulls and are fully guaranteed.

MATERNAL POWER™ IS GOOD FOR THE BOTTOMLINE

We've said it for years: true profitability in the beef business is driven by cattle that have the **Maternal Power™** to do more with less.

As your seedstock provider, we want your operation to be profitable and sustainable for generations – regardless of the market. That is why we require our stock to thrive in a no-frills, grass-based environment with minimal supplementation. **They must do more with less.**

Strommen Ranch cows must calve annually and wean a calf that is a high percentage of its dam's bodyweight. They must also possess the basic phenotypic traits to cover country, breed on time, have the smarts and mothering ability to do it on their own, all the while performing under the conditions that Mother Nature has dealt us. We select for fertility, longevity, sound structure and realistic performance in the cowherd.

Strommen Ranch calves grow out on grass. We DO NOT creep feed or use lick tubs. We choose to run our seedstock operation like a real-world commercial operation. We want your calves to perform in your environment – that's why we ask our bulls and females to shine in a similar one. Our cows have consistently improved weaning weights, while increasing the percentage of cows that re-breed in the first 21 days, maintaining mature cow size and placing downward pressure on our input costs. We are continually asking our cattle to do more with less.

Similarly, in our development program we also begin with the end in mind. We don't need to know which calf can eat the most – we need to know which calf can do the most in his natural environment. **This helps us protect your investment in a Strommen Ranch bull.** In order for

you to have a bull that lasts and has longevity, he should not be pushed at an early age. It is our intention to identify optimum gains. We allow the bulls to express their genetic potential without pushing so much energy through them that feet, hock or liver damage occur. Our ultimate goal is to have the bulls range-ready, sound-footed and ready to work.

As your seedstock source, we are fully committed to producing the type of cattle that will positively impact your bottomline. Having traveled extensively as an A.I. rep. for Genex and looking at cowherds throughout the region, I have learned that cattle with phenotypic appeal, fleshing ability and fertility are the most profitable.

Cattle that breed early in the cycle, are structurally sound and can raise big calves efficiently in a practical environment with minimal inputs are the kind of cattle we produce and believe will have a positive impact on your bottomline now and into the future.

7	-0.3	47	97	23	2/105

Recommended for use on heifers. An XXP calving-ease bull that is really long-bodied and from a 1682 daughter that scored a 10 for disposition and a 6 on udder score. She has a calving interval of 361 days and goes back to the Miss Wix 708 cow that was one of Jack's favorite cows with a progeny WR of 8/105.

 Reich Rachel 545

CE	BW	WW	YW	Milk	Dam's Production
11	-0.4	68	117	23	1/114

Recommended for use on heifers. Complete outcross heifer and calving-ease bull with this Bomber son. He did very well to weaning off his first-time Reflection daughter. The Rachel cow family has done very well and is one of the cornerstone cow families at Reichs. Granddam has a WR of 3/101 and great-granddam has a WR of 9/100. EPDs are based on a pedigree estimate.

In 2019, Cassidy exhibited the champion market hog in 4-H at the Morton County Fair, the reserve champion market hog in FFA at the Grant County Fair and received the Willard Griffin Memorial Award as the Morton County senior livestock judging team's high individual. Cooper was named reserve champion junior swine showman at the Morton County Fair and Clint completed his final year as a Morton County Cloverbud.

Your satisfaction is our top priority.

WE MEASURE OUR SUCCESS BY 3 THINGS:

1

The ability of our cowherd to set the bar for Maternal Power™. They must go out and work every day, maintain a tight calving interval through tremendous fertility and raise big calves year after year – without being pampered.

2

Watching our customers reap the rewards of using our genetics and the demand we've helped build for their feeder calves and their replacement females, as well.

3

The lasting relationships we are building with our customers and the reputation that comes from helping them reach their goals of developing successful and profitable cowherds. **Our customers' success remains our highest priority.**

FOR OUR VALUED CUSTOMERS, WE OFFER:

- Two sales with two ages of bulls:
Spring Sale: Yearlings • Fall Sale: Coming 2-Year-Olds
- Free delivery within 500 miles of Strommen Ranch.
- **Full 90-day breeding season guarantee.**
- Freeze branded.
- Fertility tested.
- Bulls that aren't overfed.
- Discounts for volume purchases and repeat buyers.
- Expanded selection, in large sire groups.
- **Exclusive commercial female marketing assistance.**
 - Badlands Angus Alliance Sale.
 - Commercial Female Listing.
- *Your satisfaction is our top priority.*
