

This was in the FAQs of the Draft 3 SCC Proposed Communicable Disease Ordinance. It was deleted from the web site. Why?

"4. Will this proposed ordinance impact individual rights?"

The intention of this ordinance is not to impact individual rights. It is a safety measure to protect all of us if our voluntary efforts fail to prevent the spread of infectious diseases and loss of life.

Public Health has the duty to protect the health and wellbeing of everyone in St. Croix County using the least restrictive means necessary. In extreme circumstances, some constitutional rights may be limited as long as there is a strong enough reason to do so and so long as the measures are implemented in the least restrictive manner possible."

(this is the link that is now dead):
