LOCATION:
Edmonton, AB

CLIENT:
Mattamy Homes

PROJECT TIMELINE:

2012	2013	2014	2015	2016
------	------	------	------	------

OUR ROLE:
Prime Consultant

PROJECT TYPE: Concept Plan & Preliminary Engineering

PROJECT DESCRIPTION:

This project currently involves the concept plan and preliminary design of approximately 1.2km of roadway in the City’s undeveloped southwest. 199 Street, from 23 Avenue NW to Riverview Way, is proposed to be a four-lane divided arterial roadway with controlled intersections at Riverview Way, 20 Avenue NW and 17 Avenue NW, two of which will have traffic lights. Detailed design will begin in the winter of 2016 with construction anticipated for later in the 2016.

SERVICES PROVIDED:

The Concept Plan required the review of relevant planning and engineering studies as well as other available information; topographic surveys; creation of the geometric design; and lane configurations to City of Edmonton Standards.

Preliminary Engineering for the project recently began and builds on the information presented in the Concept Plan.
