

Wendy Carlson

## Biography

I am a Forensic Document Examiner and Handwriting Expert with experience testifying in courts since 2008. I have been accepted as an expert in courtrooms in 16 states and 3 countries, testifying for plaintiffs, defendants, government agencies and private citizens. I have testified in local, state and federal courts, in criminal and civil cases.

As a forensic document examiner, my work has included examination of more than 16,000 documents consisting of wills, deeds, titles, graffiti, checks, suicide notes, threat notes, baseball cards, you name it, I have likely seen it.

As a handwriting expert for personality I have analyzed countless signatures and handwritings for job placement, self-improvement, and fun! Handwriting analysis is a superb means to finding out about yourself, your competition and others you are working with or against. If you can find out about someone's personality before you even get to speak with them, you are one step ahead in understanding how a person thinks, processes information, what their temperament is, and what their fears and defense mechanisms are before you even shake hands.

I would be happy to focus on one or both of these areas of handwriting analysis. One hour is a quick time frame so whatever I do I will have to be concise. Please let me know if you are interested in one topic specifically. If desired, I can come back another month for a second round or the other topic.

Thank you!
