

HAZ-MATTERS
EMERGENCY MANAGEMENT INC.

INCIDENT COMMAND SYSTEM 16 HOUR COURSE

ICS 100 & 200

Why Choose HAZ-MATTERS?

HAZ-MATTERS
EMERGENCY MANAGEMENT INC.

The Incident Command System (ICS) course developed by HAZ-MATTERS provides an overview of the ICS model to enable personnel to operate efficiently within the system during an incident or event. The course provides a thorough level of understanding of ICS to employees who become engaged in emergency management activities throughout a variety of situations.

The 2-day course is based on the original FEMA model for ICS 100/ICS 200 that is the basis of all current ICS courses in Canada and North America. Our course has been enhanced with personal situations and responses and continues to focus on Real-Life understanding that comes from Real-Life hands-on experience.

Our course is unlike all the other general emergency management courses out there – we know that most of our students are getting into much more precarious situations so we don't train for one type of event, but provide the tools to be used for ANY type of event. Whether you're a seasoned veteran or new to the industry, we focus on clearly defined methods and protocols used by responders internationally to ensure that personnel operate in the safest possible manner in environments that include:

- ◆ Hazardous materials events with known and unknown compounds
- ◆ Clandestine drug labs
- ◆ Oil spills or from pipeline releases on water or land
- ◆ Motor vehicle scenes
- ◆ Natural Disasters and Fire

HAZ-MATTERS prides ourselves on our reputation for providing clear understanding to complex and technical information for all levels of experience. It is the cornerstone of our service, and continues to always be our primary goal.

Why Choose HAZ-MATTERS?

HAZ-MATTERS
EMERGENCY MANAGEMENT INC.

HAZ-MATTERS doesn't believe that exams and a certificate is what makes the difference to a person – what makes a difference is having the tools that will help you for the rest of your career.

In fact, we believe that memory creates mistakes so we help you learn to use the tools at hand so that you don't have to remember very much at all. We still provide you with some open book tests as we go along to challenge you as well as certification in ICS 100 and 200, but most importantly we provide you with the working tools to be able to always start with what we call our Number 1 Rule:

"IF YOU DON'T KNOW WHAT YOU'RE GETTING INTO, HOW CAN YOU POSSIBLY KNOW HOW TO GET OUT?"

So we focus on:

- ◆ **The four (4) pillars of the Disaster Cycle – Prevention, Preparation, Response, and Recovery,**
- ◆ **Incident Commander function,**
- ◆ **Command Staff and General Staff Functions,**
- ◆ **Leadership,**
- ◆ **Communication and Forms**

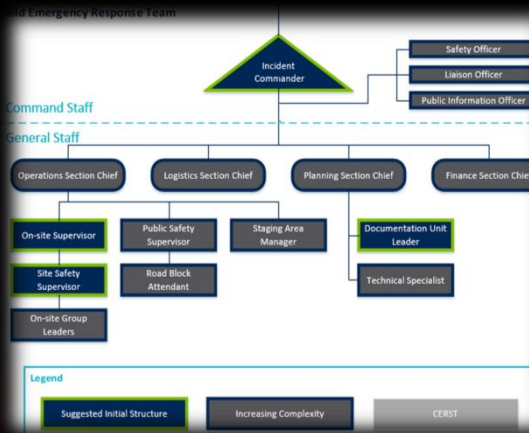

DAY 1 AGENDA

HAZ-MATTERS
EMERGENCY MANAGEMENT INC.

ICS 100

- ◆ Regulations and Overview
- ◆ ICS Design
- ◆ Incident Commander Role and Function
- ◆ Command Staff Roles and Functions
