Tailwheel / Floats / Skis

We provide instruction in Piper Super Cubs year round in Fairbanks Alaska. We provide tailwheel endorsements, ski flying instruction, float ratings and Alaska off airport flying experiences. Our instructors are all experienced Alaska pilots with a breadth and depth of knowledge to share.

Skis

We put on high flotation skis in the winter and explore wide ranging spaces around Alaska. We will show you pristine snow, off airport operations, and general winter operations down to -20F temps. The stable air and low sun angles make for great photo shoots.

Floats

From May until end of September we provide training for Seaplane ratings (private and commercial) and float experiences. You will get access to lakes and rivers around interior Alaska as well as landing in our unique float pond at the international airport.

Tailwheel

Year around we provide instruction on wheels so you can earn your tailwheel endorsement and learn to fly into off airport strips safely.
