DENTAL CLEANINGS !

We are now proudly offering affordable dental cleanings for your furry friends age 8 years old and younger. We require that your pet must already be spayed or neutered to take advantage of this service. Your pet must be current on the core vaccines listed above (3 for dog, 2 for cat), but we can update them at the time of dental cleaning. If you have recently had your pet fixed, we ask that you wait at least 4 weeks before scheduling their dental to allow the anesthesia to wear off and for healing. We cannot do the dental at the same time as your pet's surgery as it will increase risk for surgery site infection. Other services offered are also available at the time of the dental cleaning (ex. Microchipping, heartworm testing, FeLV/FIV testing, fecal exam, deworming, nail trims, anal gland expression)

<p>Dog Dental Cleaning 100 Teeth cleaning under full anesthesia, includes scaling and polishing</p>	<p>Cat Dental Cleaning 90 Teeth cleaning under full anesthesia, includes scaling and polishing</p>
----------------------------------------------------------------------------------------------------------------------------------------------------------	---------------------------------------------------------------------------------------------------------------------------------------------------------

We do not offer teeth extractions or dental x-rays, but if your pet needs them, we can offer a referral to a primary care veterinarian for additional treatment. Depending on the severity of your pet's existing dental disease, we may decline your dental procedure the morning of your appointment in order to refer you directly to a dental specialist.

FERAL CATS (TNR ONLY)

**These prices are in place to help with the control of truly feral cats that are to be Trapped, Neutered/Spayed, and Released (TNR). Ear tipping these cats is important so if they get caught again, it is clear that the cat has already been fixed and avoids unnecessary surgery. If you do not want ear tipping and are trying to make a feral cat a pet, please refer to Cat Services above.*

**A feral cat may be brought in Mon-Thurs at 7am with no appointment needed. No more than two feral cats can be brought in by a client per day.*

**Each feral cat MUST arrive in a feral cat trap, one cat per trap (this is for their safety for ours). Cat traps can be purchase online or borrowed from Cabarrus County Animal Control*

A late fee of \$25 will be charged if pet is not picked up at the designated time of 2pm same day. We close our building promptly at 3pm after all animals have left. Any animal that has not been picked up at closing will have to stay overnight and incur an overnight fee of \$50. Please be aware that no member of our staff is on the premises overnight, and owner assumes all risk for their unattended pet. CSNC is not responsible for any personal items brought in with pet. Thank you for respecting our policies so that our Non-Profit Organization may continue to provide low-cost surgeries.
