

CAPABILITY STATEMENT

The Right Solution Consulting Services, LLC is a Vertical Transportation Consultant company providing Elevator and Escalator Consulting services to clients including architects, engineers, property managers, owners, developers, construction managers and more. Our markets of service consist of commercial, educational, residential, public transportation, aviation, healthcare, hotels and governmental agencies.

CONSTRUCTION DESIGN

We provide an analysis of anticipated traffic patterns to determine the configuration, capacity, speed and quantity of elevators and escalators required to manage the vertical traffic requirements of the building including shop drawing reviews, field observations and the development of maintenance specifications.

MODERNIZATION SERVICES

The Right Solution Consulting Services, LLC works closely with its clients in providing a survey of existing conditions, preparation of a report detailing immediate repairs and future modernization needs including budget figures, evaluation of existing maintenance agreements and coordination with the present maintenance provider.

MAINTENANCE AUDITS

We perform audits of existing elevators and escalators to determine the level of preventative maintenance and operational quality. We measure and evaluate vertical transportation performance to determine efficiency and level of adjustment as compared with the equipment design capability.

INSPECTION SERVICES

The Right Solution Consulting Services, LLC performs Third Party Code Safety Inspections and Test witnessing of elevators, escalators, dumbwaiters, wheelchair lifts and personnel hoists. Our team of ASME QEI-Certified Inspectors provide comprehensive and professional inspection services for all types of equipment and facilities.
