

Sandra Prince Intermediate Care Program

Sandra Prince Intermediate Care Program (ICP) provides residential treatment with stays ranging from 90 to 120 days for those with mental health and/or substance abuse co-occurring disorders. Clients receive individualized treatment plans in an AHCA Licensed Residential Treatment Program. The ICP program is available to all qualifying Hillsborough County residents enrolled in the Hillsborough County Health Care Plan.

What are the benefits of Residential Treatment?

The benefits of residential treatment may vary, but most importantly, the residential setting offers a healthy balance between the intensity of inpatient and the freedom of outpatient treatment.

Residential treatment provides the client with an opportunity to recover in a less stressful and more supportive environment. Staff and peers offer support and feedback to encourage clients toward sobriety.

Case management and care coordination services, medication assisted treatment and wellness education, and therapy to address relapse prevention are made available to clients.

Who qualifies?

An individual who:

- Has been diagnosed as having mental illness and/or substance abuse co-occurring disorder
- Is age 18 years or older
- Is ambulatory or capable of self-transfer
- Is able to participate in treatment programming and services.
- Is medically stable and able to live independently
- Is currently enrolled in the Hillsborough County Health Care Plan.
- * Please note that outstanding warrants, certain criminal convictions/behaviors, or a history of violent behaviors may disqualify individuals from admission.

About ACTS

Agency for Community Treatment Services, Inc. (ACTS) has been serving the Tampa Bay community since 1978.
