

Puppy Socialization Veterinary Approval for Group Socialization

Pet Behavior Solutions requires that a licensed veterinarian verify that your puppy is in good health and that the immunization program is on schedule. In order for your puppy to be admitted into class, he/she should have received two rounds of the combo vaccine and tested negative for parasites. Although it is not required, we also recommend a Bordetella vaccine. Please have your veterinarian fill out this form and either bring with you or email into our office ahead of time to info@petbehaviorsolutions.com Call 480-200-2011 if you have any questions.
