DOGS LEFT IN PARKED CARS

In the event that it becomes necessary to rescue an animal from a parked car on the show grounds or parking areas immediately surrounding the show grounds neither the Staffordshire Bull Terrier Club of America, Black Mountain KC, or Primm Valley Resort will be held liable for any damages incurred as a result of rescuing the animal. Furthermore, if the rescue has to be performed by virtue of negligence, the owner, agent or any other person responsible for the rescued animal WILL be subjected to a Bench Show Hearing, as approved by the rules of the AKC, and possible prosecution from local law enforcement.

The Staffordshire Bull Terrier - AKC Standard

General Appearance: The Staffordshire Bull Terrier is a smooth-coated dog. It should be of great strength for its size and, although muscular, should be active and agile.

Size, Proportion, Substance: Height at shoulder: 14 to 16 inches. Weight: Dogs, 28 to 38 pounds; bitches, 24 to 34 pounds, these heights being related to weights. Non-conformity with these limits is a fault. In proportion, the length of back, from withers to tail set, is equal to the distance from withers to ground.

Head: Short, deep through, broad skull, very pronounced cheek muscles, distinct stop, short foreface, black nose. Pink (Dudley) nose to be considered a serious fault. Eyes—Dark preferable, but may bear some relation to coat color. Round, of medium size, and set to look straight ahead. Light eyes or pink eye rims to be considered a fault, except that where the coat surrounding the eye is white the eye rim may be pink. Ears—Rose or half-pricked and not large. Full drop or full prick to be considered a serious fault. Mouth—A bite in which the outer side of the lower incisors touches the inner side of the upper incisors. The lips should be tight and clean. The badly undershot or overshot bite is a serious fault.

Neck, Topline, Body: The neck is muscular, rather short, clean in outline and gradually widening toward the shoulders. The body is close coupled, with a level topline, wide front, deep brisket and well sprung ribs being rather light in the loins. The tail is undocked, of medium length, low set, tapering to a point and carried rather low. It should not curl much and may be likened to an old-fashioned pump handle. A tail that is too long or badly curled is a fault.

Forequarters: Legs straight and well boned, set rather far apart, without looseness at the shoulders and showing no weakness at the pasterns, from which point the feet turn out a little. Dewclaws on the forelegs may be removed. The feet should be well padded, strong and of medium size.

Hindquarters: The hindquarters should be well muscled, hocks let down with stifles well bent. Legs should be parallel when viewed from behind. Dewclaws, if any, on the hind legs are generally removed. Feet as in front.

Coat: Smooth, short and close to the skin, not to be trimmed or de-whiskered.

Color: Red, fawn, white, black or blue, or any of these colors with white. Any shade of brindle or any shade of brindle with white. Black-and-tan or liver color to be disqualified.

Gait: Free, powerful and agile with economy of effort. Legs moving parallel when viewed from front or rear. Discernible drive from hind legs.

Temperament: From the past history of the Staffordshire Bull Terrier, the modern dog draws its character of indomitable courage, high intelligence, and tenacity. This, coupled with its affection for its friends, and children in particular, its off-duty quietness and trustworthy stability, makes it a foremost all-purpose dog.

Disqualification: Black-and-tan or liver color.

Approved November 14, 1989

Effective January 1, 1990

**The Stafford is an efficient athlete.
Everything about him should reflect this.**

**There are to be no exaggerations in his make-up.
Excess would inhibit the breed's original function
as well as its health.**

**He needs enough bone, enough muscle,
and enough substance to support his powerful,
athletic endeavors, but not an excess of any of
these features.**

**He will need strength and vigor,
allied with speed and suppleness.
The Stafford should have stamina in abundance.
He should feel hard to the touch, never soft.**

**The cloddy, heavy-boned, over muscled dog
may look impressive but he'll lack the speed,
agility and stamina of the athlete.**

**The racy, light-boned dog may be agile and
athletic, but will lack strength and resilience.**

The one in the middle will get the job done.

- Alan Mitchell (Hoplite, UK)
