EXPLOSIVES DELIVERY CONTROL SYSTEMS

Tradestar control systems are ruggedized to perform in demanding mine environments. Our control systems optimize equipment performance, safeguard your operators and will save you money by delivering accurate quantities hole after hole. We have systems designed to meet your budget and efficiency requirements.

EC004 CONTROL PANEL

This unit is a proven, cost effective, hardware-based solution that monitors ingredient delivery and the final product. The EC004 is ruggedly built with user-friendly controls, and easily integrates with safety shut down systems. An optional printer facilitates reporting.

EC200 CONTROL PANEL

Our intuitive touchscreen interfaces with a ruggedized PC running Microsoft® Windows® to provide highly accurate and repeatable deliveries. An optional Eclipse Connect data collection function provides the capability to download regulatory, inventory and tracking information. The EC200 is GPS and WiFi capable and easily integrates with safety shut down systems.

EMULSION PLANT CONTROL SYSTEMS

A customized Graphical User Interface, designed to your specific requirements, operates on the Microsoft Windows PC platform to precisely execute recipes or operator selected ingredient mixes. This control system minimizes operator exposure to dangerous conditions that manual control systems typically require.

EXPERTISE

At Tradestar, we are problem solvers with the technical experience, equipment and ingenuity to get the job done. For additional information or to speak with an application expert, please email or call us!

Tradestar designs and builds explosives blending equipment and delivery vehicles that are known for their versatility and reliability.

We pioneered bulk explosives delivery systems and know how to deliver world class results to our customers around the globe.
